**Making Futures** Pelle Ehn, Elisabet M. *The Corruption of Co-Design* Otto von Busch, Karl Palmås, 2023-02-01 Designers are often depicted as social change agents that serve the good in the world Similarly co design tends to be described as a democratic mode of creativity that is somehow beyond reproach But is change a virtue in itself and do participatory practices always produce socially beneficial outcomes Such questions are becoming more pressing as co design has emerged as a dominant practice in planning and urban design while also informing corporate management and public administration In this book Otto von

Busch and Karl Palm s suggest that designers tend to overemphasize the place of ideals in design leaving them ill equipped to deal with a social world of power wielding and zero sum games Seeking to reorient the concerns of the Scandinavian tradition of participatory design they suggest that co design processes are rife with betrayals decay and corruption and that designerly empathy has morphed into a new form of cunning statecraft In putting forward Realdesign as an alternative conception of design practice von Busch and Palm s ask What hard lessons about the social must today s designers learn from realists like Machiavelli
