Designing With Nature The Ecological Basis For Architectural Design:

Designing with Nature Ken Yeang, 1995 A timely incisive book providing a comprehensive framework for designing buildings that work with nature Offering a compelling case for ecological design it provides architects and designers with a full understanding of the impact that their work has on the natural environment as well as what can be done to mitigate the damage man made structures inflict on the natural environment

Designing for Hope Dominique Hes, Chrisna du Plessis, 2014-10-17 A forward looking book on sustainable design that describes problems and then by providing a different way to conceptualise design and development leads on to examples of regenerative solutions Its aim is to move the discussion away from doing less but still detracting from our ecological capital to positively contributing and adding to this capital This book offers a hopeful response to the often frightening changes and challenges we face arguing that we can actively create a positive and abundant future through mindful contributive engagement that is rooted in a living systems based worldview Concepts and practices such as Regenerative Development Biophilic Design Biomimicry Permaculture and Positive Development are explored through interviews and case studies from the built environment to try and answer questions such as How can projects focus on creating a positive ecological footprint and contribute to community How can we as practitioners restore and enrich the relationships in our projects and How does design focus hope and create a positive legacy

The Routledge Companion to Biology in Art and Architecture Charissa Terranova, Meredith Tromble, 2016-08-12 The Routledge Companion to Biology in Art and Architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture The book presents a diversity of hybrid art and science thinking revealing how science and culture are interwoven The book situates bioart and bioarchitecture within an expanded field of biology in art architecture and design It proposes an emergent field of biocreativity and outlines its historical and theoretical foundations from the perspective of artists architects designers scientists historians and theoreticians Includes over 150 black and white images

CAD Principles for Architectural Design Peter Szalapaj, 2013-11-05 CAD Principles for Architectural Design is aimed at design students and practitioners interested in understanding how CAD is used in architectural practice This book makes connections between the basic operations that are common to most CAD systems and their use in practice on actual architectural design projects The ways in which CAD is integrated into the design processes of several leading edge practices is illustrated Arising from these case studies is the emergence of a contemporary phenomenon of integrated CAD in which all aspects of design schemes are brought together within computational frameworks that support the analysis of design proposals Szalapaj's view of CAD is one in which computers constitute a medium in which designers can express design ideas rather than viewing computers as problem solving machines For creative designers to successfully exploit CAD technology CAD systems should reflect designers intuitions as described by designers themselves

Sustainable Architecture and Urbanism Dominique Gauzin-Müller, 2002-07-01 Since the mid 1980s and in particular the 1992 environmental summit in Rio de Janeiro sustainability has become a global issue and the subject of international debate In the context of architecture sustainability implies the use of intelligent technology innovative construction methods ecologically friendly materials and use of environmentally friendly energy resources This book begins with an overview of the various approaches and developments in sustainable architecture followed by an in depth section on urbanism looking at several European towns In the third section the technologies materials and methods of ecological architecture are examined Concluding the volume are 23 sophisticated and innovative European case studies The author and architect Dominique Gauzin M ller has specialised on energy and environmental issues and ecological architecture for over 15 years

Tropical Urban Heat Islands Nyuk Hien Wong, Yu Chen, 2008-08-29 This book explores the complex relationships between climate buildings and plants especially in urban heat islands to form a reference for researchers and professionals

Building Ecology Peter Graham, 2009-02-12 Buildings consume 40% of our planet s materials and 30% of its energy Their construction uses up to three million tonnes of raw materials a year and generates 20% of the soild waste stream If we want to survive our urban future there is no option but to build in ways which improve the health of ecosystems Understanding the concept of ecological sustainability and translating it into practice as sustainable development is a key challenge for today s built environment professionals The skill and vision of those who shape our cities and homes is vital to achieving sustainable solutions to the many environmental economic and social problems we face on a local national and global scale Peter Graham offers here a holistic view of ecologically sustainable building by drawing on established areas of knowledge demonstrating their relevance to the environmentally conscious building professional and putting the process product and impact of building into context Case studies illustrate how sustainable principles have been applied successfully and discussion topics are offered to stimulate thought Building Ecology will help planners surveyors designers and builders to incorporate sustainability into their everyday practice by

showing which styles of building are ecologically sustainable providing fundamental knowledge for making decisions using the principles of ecologically sustainable building explaining a complex subject in a clear balanced way Building Ecology sets out the current scientific view of how nature works and how buildings link with and affect nature It provides fundamental knowledge for building in harmony with nature and keeping Earth s life supporting ecosystems healthy **The Routledge Handbook on Greening High-Density Cities** Peng Du,Kheir Al-Kodmany,Mir M. Ali,2024-06-17 This new handbook provides a platform to bring together multidisciplinary researchers focusing on greening high density agglomerations from three perspectives climate change social implications and people s health Written by leading scholars and experts the chapters aim to summarize the state of the art and produce a reference book for policymakers practitioners academics and researchers to study design and build high density cities by integrating green spaces The topics covered in the book include but are not limited to Urban Heat Island Green Space and Carbon Sequestration Green Space and Social Equity Green Space and Public Health Biophilic Cities Urban Agriculture Vertical Farms Urban Farming Technologies Nature and Biodiversity Nature and Health Biophilic Design Green Infrastructure Urban Revitalization Post Covid Cities Smart and Resilient Cities Tall Buildings and Sustainable Vertical Cities [The Handbook of Contemporary Indigenous Architecture](#) Elizabeth Grant,Kelly Greenop,Albert L.
