Development and Social Change Philip McMichael, 2008 Fourth edition of this international bestseller Adopted by sociology politics development and also geography departments **Sociology for a New Century** York William Bradshaw, Joseph F. Healey, Rebecca Smith, 2001-03-08 Written with the conviction that sociology can play a major role perhaps THE major role in helping college students understand how their lives are shaped by the complexities of global social forces in our new century Helps students develop an approach to thinking about social issues and evaluating claims and arguments that they can use long after the course has ended Reflects the following qualities from the sociological tradition a commitment to the principles of scientific investigation a deep concern for social issues and human welfare and a macro approach that takes account of history geography and relations between the societies and regions of the globe Strives less to introduce sociology and more to demonstrate the power and value of thinking sociologically about societies today Centers on a small number of organizing themes and principles introduced in Chapter 1 and used throughout the remainder of the text see detailed table of contents Contains 16 chapters and 7 topical essays interspersed between Chapters 1 10 The

first 10 chapters are the core foundation of the text Chapters 11 15 apply sociological thinking to a series of significant global issues including war work health and population growth Chapter 16 brings the text to a close with a discussion of how individuals and organizations can create positive change in the world Written to help teach the process of investigation the sociological craft of research critical thinking and careful analysis Rather than presenting students with answers the core Chapters 1 10 are each organized around a specific question or problem selected for its interest to students as well as its importance to the U S and the world see table of contents Thus sociological terms and concepts are introduced as they become relevant to the analysis never for their own sake The Topical Essays broaden the coverage of issues and diversity of viewpoints in the text while the book maintains its overall thematic coherence Most essays are written by leading scholars and researchers in sociology save one essayist who is an undergraduate student Tracey Dawson and one a cartoonist Nick Rutter who has illustrated Gay Seidman s essay on Sweatshops and Chapters 11 16 Active Learning Exercises extend and reinforce the emphasis on critical thinking throughout the book A Web Site specifically devoted to Sociology For a New Century provides many helpful ways students can strengthen their ability to think and see sociologically A Sociological Atlas in the back of the book provides 32 four color maps of global sociological information as well as a wealth of web sites and other information resources Graphical Displays of Social Data and informative Photographs and Cartoons throughout the chapters make learning easier and more fun Teaching Resources available upon adoption of the text contains an excellent set of various tests and an annotated set of literary and visual resources in addition to an annotated bibliography of teaching resource materials Development and Social Change Philip McMichael, Heloise Weber, 2020-12-15 Development and Social Change A Global Perspective describes the dramatic acceleration of the global and political economy in four parts colonialism the development era the current era of globalization and global counter movements for equity and sustainability

Albert Rorabacher, 2016-09-13 The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Afghanistan Nepal Bhutan Bangladesh and Sri Lanka **Law/Society** John Sutton, 2001 A core

text for the Law and Society or Sociology of Law course offered in Sociology Criminal Justice Political Science and Schools of Law John Sutton offers an explicitly analytical perspective to the subject how does law change What makes law more or less effective in solving social problems What do lawyers do Chapter 1 contrasts normative and sociological perspectives on law and presents a brief primer on the logic of research and inference as it is applied to law related issues Theories of legal change are discussed within a common conceptual framework that highlights the explanatory strengths and weaknesses of different arguments Discussions of law in action are explicitly comparative applying a consistent model to explain the variable outcomes of civil rights legislation Many concrete in depth examples throughout the chapters

Making Societies William G. Roy, 2001-01-23 The only book written for undergraduates about the social construction of reality that is also historical and comparative In addition it includes chapters on the social construction of time and space as well as the more traditional chapters on race class and gender This book shows how these social constructions of time space race gender and class intersect with each other to produce particular social phenomena that are enduring and significant for our society No other book for undergraduate teaching has ever done this this is a real first If the goal of this series is to broaden the students vision no book is more ambitious toward attaining that goal than Making Societies Roy helps students question the most natural of categories time space gender race and class Leading them through examples drawn from around the world he shows how these categories are social constructions historically formed ideologically loaded and subject to change This may be profoundly unsettling for students will be encouraged to question not only what they know but also the conceptual frameworks they use when they claim to understand anything As Series Editors it is our belief that this provocation will open new ways of thinking about the social world how it is and how it might be Wendy Griswold Series Editor Northwestern University from the foreword I love the organizing concept of the social construction of reality and using a cross cultural historical comparative approach to analyzing key themes space time race gender and class I particularly like the focus on space and time first because it illustrates how deeply embedded the social construction of reality is Joanne Defiore University of Washington Bothel The book is intellectually strong it is driven by ideas and engages important processes of social life Lisa Brush University of Pittsburgh Contributor to the SAGE Teaching Innovations and Professional Development Award

Waves of Democracy John Markoff, 1996-02-07 Instead of presenting democracy as an ideal political system that humans only imperfectly realize John Markoff conceptualizes democracy as something continually being reinvented Instead of reducing democracy to well defined and routine practices and institutions such as elections and parliaments Markoff shows how political movements have repeatedly challenged and remade existing institutions After reviewing two centuries of political conflict he concludes with a thoughtful and exciting discussion on what democracy means today and what its future might be
