Digital Processing of Synthetic Aperture Radar Data Ian G. Cumming, 2005 *Radar Interferometry* Bert M.

Kampes, 2006-09-21 This volume is devoted to the Persistent Scatterer Technique the latest development in radar interferometric data processing It is the only book on Permanent Scatterer PS technique of radar interferometry and it details a newly developed stochastic model and estimator algorithm to cope with possible problems for the application of the PS technique The STUN spatio temporal unwrapping network algorithm developed to cope with these issues in a robust way is presented and applied to two test sites **Recent Advances in Aircraft Technology** Ramesh K. Agarwal, 2012-02-24

The book describes the state of the art and latest advancements in technologies for various areas of aircraft systems In particular it covers wide variety of topics in aircraft structures and advanced materials control systems electrical systems inspection and maintenance avionics and radar and some miscellaneous topics such as green aviation The authors are leading experts in their fields Both the researchers and the students should find the material useful in their work

On the Convergence of the Phase Gradient Autofocus Algorithm for Synthetic Aperture Radar Imaging ,1996

Synthetic Aperture Radar SAR imaging is a class of coherent range and Doppler signal processing techniques applied to remote sensing The aperture is synthesized by recording and processing coherent signals at known positions along the flight path Demands for greater image resolution put an extreme burden on requirements for inertial measurement units that are used to maintain accurate pulse to pulse position information The recently developed Phase Gradient Autofocus algorithm relieves this burden by taking a data driven digital signal processing approach to estimating the range invariant phase aberrations due to either uncompensated motions of the SAR platform or to atmospheric turbulence Although the performance of this four step algorithm has been demonstrated its convergence has not been modeled mathematically A new sensitivity study of algorithm performance is a necessary step towards this model Insights that are significant to the application of this algorithm to both SAR and to other coherent imaging applications are developed New details on algorithm implementation identify an easily avoided biased phase estimate A new algorithm for defining support of the point spread function is proposed which promises to reduce the number of iterations required even for rural scenes with low signal to clutter ratios **Algorithms for Synthetic Aperture Radar Imagery X** Edmund G. Synthetic Aperture Radar J. Patrick Fitch, 2012-12-06 Radar like most well developed areas has its own vocabulary Words like Doppler frequency pulse compression mismatched filter carrier frequency in phase and quadrature have specific meaning to the radar engineer In fact the word radar is actually an acronym for RAdio Detection And Rang ing Even though these words are well defined they can act as road blocks which keep people without a radar background from utilizing the large amount of data literature and expertise within the radar community This is unfortunate because the use of digital radar processing techniques has made possible the analysis of radar signals on many general purpose digi tal computers Of special interest are the surface mapping radars such as the Seasat and the shuttle imaging radars which utilize a technique known as synthetic aperture radar SAR to create high resolution images pic tures This data appeals to cartographers agronomists oceanographers and others who want to perform image enhancement parameter estima tion pattern recognition and other information extraction techniques on the radar imagery The first chapter presents the basics of radar processing techniques for calculating range distance by measuring round trip propagation times for radar pulses This is the same technique that sightseers use when calculat ing the width of a canyon by timing the round trip delay using echoes In fact the corresponding approach in radar is usually called the pulse echo technique
