Piercy, 2000 The Oxford Handbook of the Learning Organization Anders Örténblad, 2019-12-12 The concept of the learning organization is one of the most popular management ideas of the last few decades Since it was conceived as an idea in its own right it has been given various definitions and meanings such that we are still faced with the question as to whether any unified understanding of what the learning organization really is can be established This Handbook offers extensive reviews of both new and traditional perspectives on the concept and provides suggestions for how the learning organization can best be defined practiced studied and developed in future research With contributions from long standing scholars in the field as well as those new to the area this book aims to bridge the gap between traditional and more critical perspectives and in doing so find alternative features and angles to take the idea forward In addition to elaborating on and developing older definitions of the learning organization and suggesting updated and even new definitions the chapters also provide focused explorations on pertinent aspects of the learning organization such as ambidexterity gender inclusivity and systems thinking They also survey organizations that have made efforts towards becoming learning organizations how the learning organization can best be measured and studied and the universality of the idea itself Some of the questions raised in this book are answered or at least given tentative answers while other questions are left open In this way the book has the ambition to take the learning organization an important step further whilst having no intentions to take any final step instead the intention is that others will endeavour to continue where this book stops Handbook of Research on the Learning

The Learning Organization Concept Tarek El Kassar, 2020 Organizational learning is a principal tool in achieving long term survival and sustainable competitive advantage of an enterprise Organizational learning has become a tremendously important topic of interest in recent years There is considerable debate regarding the importance of organizational learning and its impact on the performance and competitive advantage of the organization The purpose of this research is to study to which extend the concepts of the learning organization are present in private companies in Dubai In this study we used a survey research design with the organization as the unit of analysis In the study we used a convenience sample of private companies based in the Emirate of Dubai UAE The target population was managers at all levels general management operations administration human resources marketing sales and technical head because they are well positioned to assess the organizations learning needs systems and philosophy and have an understanding of where the organization stands in relation to these issues The survey included demographic information about the firm and included the total number of employees In this study we obtained 155 N respondents in the final sample with complete data Measuring learning orientation has been framed in the literature by constructs described by Watkins and Marsick 1993 1999 Senge 1990 and Garvin 2000 Learning orientation was measured using the scale originally constructed and validated by Watkins and Marsick 1999 the Dimensions of the Learning Organization and Yang Watkins and Marsick 2004 The DLOQ consists of 55 questions to measure the correlation of seven learning organization dimensions and certain organizational characteristics regarding financial and knowledge performance Respondents were asked to indicate their perception of the degree to which their organization practices the described behaviors on a six point Likert type scale The data gathered from the survey was then organized in multiple ways for better analysis and entered into SPSS version 22 0 Based on the above findings we can reject the null Hypothesis that Dubai Private Companies do not embrace the Learning Organization Dimensions accept the alternative Thus we can conclude that Dubai Private Companies embrace to some extent the Learning Organization Dimensions described by Watkins and Marsick which we measured using the DLOQ Dimensions of the Learning Organization Questionnaire
