Diploma Paper Solution:

CRC Handbook of Thermodynamic Data of Polymer Solutions at Elevated Pressures Christian

Wohlfarth, 2005-01-27 This handbook provides the only complete collection of high pressure thermodynamic data that is essential for understanding polymer solutions. It contains data on vapor liquid equilibria and gas solubilities, liquid liquid equilibria, high pressure fluid phase equilibria for polymer systems in supercritical fluids, enthalpic and volumetric data, as well as second virial coefficients, all at elevated pressures. It covers all areas needed by researchers and engineers who handle polymer systems in supercritical fluids, materials science, and technological applications such as computerized predictive packages and chemical and biochemical processes such as synthesis and characterization, fractionation, separation, purification, and finishing of polymers and related materials. *CRC Handbook of Thermodynamic Data of Polymer Solutions, Three Volume Set* Christian Wohlfarth, 2018-10-03

Providing valuable insight on physical behavior of polymer solutions, intermolecular interactions, and the molecular nature of mixtures, each volume in this one-of-a-kind handbook brings together reliable, easy-to-use entries, references, tables, examples, and appendices on experimental data from hundreds of primary journal articles, dissertations, and other published papers. This three-volume set presents hundreds of data sets, including VLE, gas solubility, isotherms, LLE, and HPPE for polymer systems in supercritical fluids, as well as volumetric, enthalpic, and virial coefficient data sets essential for handling industrial and laboratory processes involving all types of polymer systems. *CRC Handbook of Liquid-Liquid Equilibrium Data of Polymer Solutions* Christian Wohlfarth, 2007-11-19 Thermodynamic data form the basis for separation processes used in different fields of science and industry, from specialty chemicals to foods and pharmaceuticals. One obstacle to developing new production processes, products, or optimization is the lack or inaccessibility of experimental data related to phase equilibrium. Access More Than 1200 Data Sets Including 810 Binary Systems, 325 Ternary Systems, and 25 Quaternary or Higher Systems. The CRC Handbook of Liquid-Liquid Equilibrium Data of Polymer Solutions provides a thorough and up-to-date compilation of experimental liquid-liquid equilibrium (LLE) data and their original sources. Arranged in a consistent format, the handbook provides convenient access to cloud point and coexistence data, as well as upper and lower critical solution temperatures and important demixing data for each system. An Excellent Companion to the Author's Previous Collections of Thermodynamic Data. While the author's previous data compilations center around specific types of polymer systems, Wohlfarth's latest work distinguishes itself by focusing instead on representing LLE data for all types of polymer systems in a single source.
