Discourses Of Power From Hobbes To Foucault:

Discourses of Power Barry Hindess,1996 **The SAGE Handbook of Power** Mark Haugaard,2009-03-12 Power is arguably one of the key concepts within the social sciences The SAGE Handbook of Power is the first touchstone for any student or researcher wishing to initiate themselves in the state of the art Internationally acclaimed Stewart R Clegg and Mark Haugaard have joined forces to select a collection of papers written by scholars with global reputations for excellence These papers bridge different conceptual and theoretical positions and draw on many disciplines including politics sociology and cultural studies The sweep and richness of the resulting handbook will help readers contextualise and grow their understanding of this dynamic and important subject area **Deconstruction and the 'Unfinished Project of Modernity'** Christopher Norris,2020-11-25 Through a close engagement with some key thinkers Norris argues that deconstruction is part of the unfinished project of modernity a project whose interest and values it upholds by continuing to question them in a spirit of enlightened self critical inquiry *Power and Politics in Poststructuralist Thought* Saul Newman,2007-04-11 This book explores the impact of poststructuralism on contemporary political theory by focussing on problems and issues central to politics today Drawing on the theoretical concerns brought to light by the poststructuralist thinkers Foucault Derrida Lacan Deleuze and Max Stirner Newman provides a critical examination of new developments in contemporary political theory post Marxism discourse analysis new theories of ideology and power hegemony radical democracy and psychoanalytic theory He re examines the political in light of these developments in theory to suggest new ways of thinking about politics through a reflection on the challenges that confront it This volume will be of great interest to students of postmodernism and poststructuralist theory in political science philosophy sociology philosophy and cultural studies Encyclopedia of Power Keith Dowding,2011-02 Collects 381 entries that discuss political science international relations and sociology *Power and the Social* Dr Sallie Westwood,Sallie Westwood,2003-09-02 Looking at the different ways power has been theorised from Hobbes to Giddens this book analyzes the ways in which the theories have been applied By bringing together theory and substantive analysis this invaluable introductory text provides a clear and imaginative account of power and power relations Processes and structures of power are analyzed within key areas of sociological concern including the history of power race gender class sexuality the spatial and visual Investigating a wide range of cases from across the globe including the underclass in Britain the power of the military in Latin America the untouchables in India and the politics of new reproductive technologies Dr Sallie Westwood adopts a popular approach to the subject looking at the processes of power as well as structure and at how they function in everyday life The Later Foucault Jeremy Moss,1998-03-06 Why does Foucault s work continue to be of central importance in current debates in sociology political science and philosophy Why do we still read him as a guide to contemporary social and cultural life Foucault s work presents a provocative challenge to orthodox habitual forms of belief and practice The Later Foucault with an impressive

interdisciplinary focus argues that one of the keys to understanding Foucault is his political thought. It is this which he expressed clearly in his last writings and which pulled together his earlier interests in power, agency and subjectivity. In this volume a distinguished array of Foucauldian scholars and commentators on politics explore the significance of these last writings. They examine such key issues as the question of Foucault and human rights, his relationship to ethical thought, power and freedom, his relationship to feminism and comparisons of his work with Levinas and Rawls.

Power and Urban Space in Pre-Modern Holland Clé Lesger, 2024-02-22 Cities and urban societies have many faces. In this study the pre-modern cities of Holland are presented as arenas where power relations between social classes are expressed in a more or less permanent appropriation of physical space and through discursive strategies. The continuity of the power relations in the cities of Holland spanning centuries makes it urgent to look not only at the assumption of urban space as an expression of power relations within society but also at the contribution of this appropriation to the acceptance and continuity of the existing power relations in pre-modern Holland. Within this broad area extensive attention is paid to the very prominent and enduring appropriation of urban space in the field of housing, the less permanent but violent appropriation of urban space during the public execution of scaffold punishments, the maintenance of public order by civic militias and appropriation during riots and revolts. In addition, city descriptions, maps and pictures of the pre-modern cities of Holland are scrutinised for what they can reveal about the appropriation of urban spaces. These themes each have an extensive historiography but they have never been brought together in an interpretative framework that fits in with Pierre Bourdieu's model of society and the work of especially John Allen on power until now.

On the Concept of Power Guido Parietti, 2022 Power is the central organizing concept for politics. However, despite decades of debate across political science, sociology and philosophy, scholars have not yet settled on a proper definition of power. Political science has looked at how power works but according to Guido Parietti fails to define what power means. Bringing together different disciplinary discourses, *On the Concept of Power* examines the conditions for power to have an actual referent in other words for politics to appear in our world. In this original and ambitious critique of the prevailing approaches to political theory and political science, Parietti examines what it means to have power and what may endanger our access to and exercise of it.

Shakespeare, Machiavelli, and Montaigne Hugh Grady, 2002 The four plays of Shakespeare's *Henry* and the slightly later *Hamlet* brilliantly explore interconnections between political power and interior subjectivity as productions of the newly emerging constellation we call modernity. Hugh Grady argues that for Shakespeare, subjectivity was a critical negative mode of resistance to power, not as many recent critics have asserted its abettor.

International Political Sociology Tugba Basaran, Didier Bigo, Emmanuel-Pierre Guittet, R. B. J. Walker, 2016-07-22 This book presents an overview and evaluation of contemporary research in international political sociology (IPS). Bringing together leading scholars from many disciplines and diverse geographical backgrounds, it provides unprecedented coverage of the key concepts and research through which IPS has opened up new ways of thinking about

international relations It also considers some of the consequences of such innovations for established forms of social and political analysis It thus takes the reader on an intellectual journey engaging with questions about boundaries and limits among the many interrelated worlds in which we now live the ways we conceptualise them and how we continually reshape boundaries of identities spaces authorities and disciplinary knowledge The volume is organized three sections Lines Intersections and Directions The first section examines some influences that led to the formation of the project of IPS and how it has opened up avenues of research beyond the limits of an international relations discipline shaped within political science The second section explores some key concepts as well as a series of heated discussions about power and authority practices and governmentality performativity and reflexivity The third section explores some of the transversal topics of research that have been pursued within IPS including inequality migration citizenship the effect of technology on practices of security the role of experts and expertise data driven surveillance and the relation between mobility power and inequality This book will be an essential source of reference for students and across the social sciences Shaping Claims to Urban Land Fons van Overbeek, 2022-10-03 The concept of hybridity is often still poorly theorized and problematically applied by peace and development scholars and researchers of resource governance This book turns to a particular ethnographic reading of Michel Foucault's Governmentality and investigates its usefulness to study precisely those mechanisms processes and practices that hybridity once promised to clarify Claim making to land and authority in a post conflict environment is the empirical grist supporting this exploration of governmentality Specifically in the periphery of Bukavu This focus is relevant as urban land is increasingly becoming scarce in rapidly expanding cities of eastern Congo primarily due to internal rural to urban migration as a result of regional insecurity The governance of urban land is also important analytically as land governance and state authority in Africa are believed to be closely linked and co evolve An ethnographic reading of governmentality enables researchers to study hybridization without biasing analysis towards hierarchical dualities Additionally a better understanding of hybridization in the claim making practices may contribute to improved government intervention and development assistance in Bukavu and elsewhere **Power and Organizations** Stewart R Clegg, David Courpasson, Nelson Phillips, 2006-06-29 A marvelous addition to the literature on both organizations and power It is well grounded in the research on these topics and especially the wide range of relevant theorizing The book is terrific at bringing together theory research and the world of organizations George Ritzer Distinguished University Professor University of Maryland This book tirelessly illuminates the nooks and crannies of the power literature taking readers on an audacious tour of power's multiple conceptualizations and expressions Hugh Willmott Diageo Professor of Management Studies University of Cambridge Clegg and his associates expose the power dynamics that lie at the heart of all political and organizational arenas and in so doing they shed light on the underbelly along with the creative potentialities in organizational life Joyce Rothschild Professor of Sociology Virginia Polytechnic Institute and State University Strange but true most studies of organizational

hierarchies downplay the issue of power or uncritically assume more is better while ignoring its pernicious effects Stewart Clegg David Courpasson and Nelson Phillips set the record straight Joanne Martin Merrill Professor of Organizational Behavior and by courtesy Sociology Stanford University Graduate School of Business Stanford In this tour de force Stewart Clegg David Courpasson and Nelson Phillips provide a comprehensive account of power and organizations unlocking power as the central relation of modern organizations and society The authors present an excellent synthesis of organization social and political theory to offer an overview of power and organizations that is historically informed addresses current issues and is comprehensive in scope Power and Organizations reviews the evolution of theories on power and organization presenting not only the theorists who identify power as positive but also dealing with the negativity of power and the real horror of which organizations are capable which has thus far been underplayed in organization theory At the core of organizational power projects are organizational elites whose politics and projects are examined extensively in the book The book concludes by examining the implications for organizations and their elites of the trends tendencies and theories considered in the course of the book This book is required reading for graduate students and researchers in areas such as organizational social and political theory

Charisma Jo Bac, 2013-12 Thoughts and ways of thinking give us our substance and personal essence which make us so individualistic but conversely allow us to closely relate to each other Our here and now our reality or actuality is deeply rooted in our beliefs hopes and plans for the future That is the reason why it is never about bullshit but is always about Hoping Dreaming and our Imagination as well as about the way how we negotiate and renegotiate our thoughts with those who create with us the here and now This paper and future research are dedicated to the political world which is increasingly becoming virtual in a visionary leadership created by each of us in our own personal way

Foucault's Analysis of Modern Governmentality Thomas Lemke, 2019-03-05 Tracking the development of Foucault's key concepts Lemke offers the most comprehensive and systematic account of Michel Foucault's work on power and government from 1970 until his death in 1984 He convincingly argues using material that has only partly been translated into English that Foucault's concern with ethics and forms of subjectivation is always already integrated into his political concerns and his analytics of power The book also shows how the concept of government was taken up in different lines of research in France before it gave rise to governmentality studies in the Anglophone world Foucault's Analysis of Modern Governmentality provides a clear and well structured exposition that is theoretically challenging but also accessible for a wider audience Thus the book can be read both as an original examination of Foucault's concept of government and as a general introduction to his genealogy of power

Turkey, Power and the West Ali Bilgic, 2016-09-29 During the leadership of Recep Tayyip Erdogan and the AKP the Turkish government shifted from a reactive to an activist foreign policy As a result many in the West increasingly began to see Turkey as a key actor in the international relations of the region and indeed the wider international stage Turkey and the West offers a unique approach to this transformation and considers questions of Turkish national identity and its relations with the West through the lens of gender studies From the Ottoman Empire to the present day the book constructs an image of Turkish foreign policy as reflecting a gendered insecurity one of a non Western Turkish masculinity subordinated to a Western hegemonic masculinity and shows how Turkey's subordination has in turn been internalised by its own politicians Across a diverse range of sources Bilgic takes advantage of new theories such as critical security studies CSS to paint a picture of a Turkish republic anxious to make its mark on the world stage yet perennially

insecure about its position as a global power Turkey and the West is essential for students and researchers interested in Turkish politics and the international relations of the Middle East as well as those with an interest in gender and identity studies
