Learning to Teach Design and Technology in the Secondary School Alison Hardy, 2020-10-01 *Learning to Teach Design and Technology in the Secondary School* is a core text for all those training to teach design and technology in the secondary school. It helps you develop subject knowledge, acquire a deeper understanding of the role, purpose and potential of design and technology within the secondary curriculum, and provides the practical skills needed to plan, teach and evaluate stimulating and creative lessons. This fully updated fourth edition includes information on all areas of design and technology, and on new subject requirements relating to exam qualifications. It includes three new chapters on the role of critiquing in design and technology education, transitions after secondary design and technology, and using and producing design and technology education research. Designed to be read as a course or dipped into for support and advice, it covers each area of design and technology: materials, textiles, electronics, and food. Integrating new curriculum topics such as emerging technologies into your teaching. Developing areas of subject knowledge. Health and safety. Planning lessons. Organising and managing the classroom. Teaching wider issues through design and technology. Assessment issues. Your own professional development. Bringing together insights from current educational theory and the best contemporary classroom teaching and learning, this book will prove an invaluable resource for students on all training routes, as well as their mentors who aspire to become effective, reflective design and technology teachers.

Gender in Music Production Russ Hepworth-Sawyer, Jay Hodgson, Liesl King, Mark Marrington, 2020-04-07 The field of music production has for many years been regarded as male dominated. Despite growing acknowledgement of this fact and some evidence of diversification, it is clear that gender representation on the whole remains quite unbalanced. *Gender in Music Production* brings together industry leaders, practitioners and academics to present and analyze the situation of gender within the wider context of music production, as well as to propose potential directions for the future of the field. This much anticipated volume explores a wide range of topics, covering historical and contextual perspectives on women in the industry, interviews, case studies, individual position pieces, as well as informed analysis of current challenges and opportunities for change. Groundbreaking in its synthesis of perspectives, *Gender in Music Production* offers a broadly considered and thought-provoking resource for professionals, students and researchers working in the field of music production today.

Dyslexia and Design & Technology Frances Ranaldi, 2013-02-01 This practical guide will help busy teachers and learning support staff present the design technology curriculum in a way that will make it accessible to dyslexic pupils and create a more flexible and positive learning environment. Drawing upon her experience as a designer, teacher and mother of two dyslexic children, and also as a dyslexic learner herself, the author dispels myths about the difficulties faced by dyslexic learners, explains the variety of learning difficulties that they experience, highlights the help that they need to access their potential, gives an insight into issues relating to craft and design, offers flexible strategies and solutions that can be used in the classroom or workshop.
