The Art & Science of Learning Design Marcelo Maina, Brock Craft, Yishay Mor, 2015-07-21 We live in an era defined by a wealth of open and readily available information and the accelerated evolution of social mobile and creative technologies The provision of knowledge once a primary role of educators is now devolved to an immense web of free and readily accessible sources Consequently educators need to redefine their role not just from sage on the stage to guide on the side but as more and more voices insist as designers for learning The call for such a repositioning of educators is heard from leaders in the field of technology enhanced learning TEL and resonates well with the growing culture of design based research in Education However it is still struggling to find a foothold in educational practice We contend that the root causes of this discrepancy are the lack of articulation of design practices and methods along with a shortage of tools and representations to support such practices a lack of a culture of teacher as designer among practitioners and insufficient theoretical development The Art and Science of Learning Design ASLD explores the frameworks methods and tools available

for teachers technologists and researchers interested in designing for learning Learning Design theories arising from findings of research are explored drawing upon research and practitioner experiences It then surveys current trends in the practices methods and methodologies of Learning Design Highlighting the translation of theory into practice this book showcases some of the latest tools that support the learning design process itself

Online Worlds: Convergence of the Real and the Virtual William Sims Bainbridge,2009-12-08 William Sims Bainbridge Virtual worlds are persistent online computer generated environments where people can interact whether for work or play in a manner comparable to the real world The most prominent current example is World of Warcraft Corneliussen and Rettberg 2008 a massively multiplayer online game with 11 million s sscribers Some other virtual worlds notably Second Life Rymaszewski et al 2007 are not games at all but Internet based collaboration contexts in which people can create virtual objects simulated architecture and working groups Although interest in virtual worlds has been growing for at least a dozen years only today it is possible to bring together an international team of highly accomplished authors to examine them with both care and excitement employing a range of theories and methodologies to discover the principles that are making virtual worlds increasingly popular and may in future establish them as a major sector of human centered computing
