Architectural Record, 1922 *Sustainability and Privilege* Gabriel Arboleda, 2022-05-13 Social design the practice of designing for poverty relief is one of the most popular fields in contemporary architecture Its advocates focusing on the architect s creativity and good intentions are overwhelmingly laudatory while its detractors concerned with the experience of its beneficiaries have dismissed it as an expression of cultural imperialism Placed midway between innocuous celebration and radical critique Sustainability and Privilege highlights the lessons that can be learned from social design s current limitations and proposes a feasible way to improve this practice In this broad ranging account enlivened by fieldwork and case studies Gabriel Arboleda contends that social design s invocation of sustainability often serves to marginalize and displace vulnerable populations through projects that involve experimentation of faulty alternative technologies or that result in so called green gentrification or that impose untoward economic and other burdens Arboleda is fiercely critical of the way social design has been carried out in impoverished regions of the world most notably in Africa and Latin America In addressing the challenges posed by issues of privilege in social design s use of sustainability the book proposes a new interdisciplinary approach called ethnoarchitecture arguing for a simpler open ended and stakeholder driven process that eliminates the casual imposition of the architect s ideas on vulnerable populations foregrounding the people s voices experience and input in social design practice

Almanac of Architecture & Design, 2005 James P. Cramer, 2005

Sustainable Urban Design Adam Ritchie, Randall Thomas, 2013-12-16 By the end of the twenty first century it is thought that three quarters of the world s population will be urban our future is in cities Making these cities healthy vibrant

and sustainable is an exceptional challenge which this book addresses. It sets out some of the basic principles of the design of our future cities and through a series of carefully selected case studies from leading designers' experience illustrates how these ideas can be put into practice. Building on the first edition's original format of design guidance and case studies, this new edition updates the ideas and techniques resulting from further research and practice by the contributors. This book emphasises the enormous progress made towards exciting new designs that integrate good design with resource efficiency.

Designing Gender Sensitive Spaces for Consenting Cities Jess Berry, Nicole Kalms, Timothy Moore, Gene Bawden, 2025-03-18. This edited collection investigates gender sensitive spaces, design practices and provocations that challenge the complex social and material structures that shape inequities of access and inclusion in the urban environment. *Designing Gender Sensitive Spaces for Consenting Cities: Practices and Provocations* centres intersectional gender sensitive approaches to design in the urban environment as an integral strategy in combating spatial inequities. Through an investigation of design-led methods, project case studies, activist interventions and processes of resistance and agency, this volume offers new thinking and practical approaches to demonstrate how design might shift towards safer and more inclusive cities for women, gender diverse people and LGBTIQ communities. This book will appeal to practitioners, scholars and students of urbanism, design, planning, architecture and geography, as well as government and non-profit organisations that are interested in gender and equality and can influence the future narratives of cities. "Craft, Space and Interior Design, 1855-2005" Sandra Alföldy, 2017-07-05. Constructed space is defined by its shape, by the materials with which it is enclosed and by the objects that are placed within or decorate its exterior or interior. The interaction of these crafted objects or decorated surfaces with space provides viewers or inhabitants with visual clues about the environment, as well as visual cues about decorum. Viewers can know what kind of behaviour is expected and what the space means. Furnishings and dress, textile panels and clay pots, stained glass and gesso panels, all defined as craft or decorative art, give architectural space defined as high art its character. Without craft, architecture is empty and devoid of meaning. This engaging collection of essays presents the first sustained exploration of the relationship of craft to architectural spaces. The book unravels the complex ways in which craft controls, manipulates, organises and defines space to highlight how the relationship between craft and space can be understood as a form of communication between related parts that combine to form a unified whole. **Design Studio Pedagogy** Ashraf M. A. Salama, Nicholas Wilkinson, 2007. *Humanitarian Architecture* Esther Charlesworth, 2014-06-27. Never has the demand been so urgent for architects to respond to the design and planning challenges of rebuilding post-disaster sites and cities. In 2011, more people were displaced by natural disasters (42 million) than by wars and armed conflicts. And yet the number of architects equipped to deal with rebuilding the aftermath of these floods, fires, earthquake, typhoons and tsunamis is chronically short. This book documents and analyses the expanding role for architects in designing projects for communities after the event of a natural disaster. The fifteen case studies featured in the

body of the book illustrate how architects can use spatial sensibility and integrated problem solving skills to help alleviate both human and natural disasters The cases include Lizzie Babister Department of International Development UK Shigeru Ban Winner of The Pritzker Architecture Prize 2014 Shigeru Ban Architects and Voluntary Architects Network Japan Eric Cesal Disaster Reconstruction and Resiliency Studio and Architecture for Humanity Japan Hsieh Ying Chun Atelier 3 Taiwan Nathaniel Corum Education Outreach and Architecture for Humanity USA Sandra D Urzo Shelter and Settlements and International Federation of the Red Cross and Red Crescent Societies Switzerland Brett Moore World Vision International Australia Michael Murphy MASS Design Group USA David Perkes Gulf Coast Community Design Studio USA Paul Pholeros Healthabitat Australia Patama Roonrakwit Community Architects for Shelter and Environment Thailand Graham Saunders International Federation of Red Cross and Red Crescent Societies Switzerland Kirtee Shah Ahmedabad Study Action Group India Maggie Stephenson UN HABITAT Haiti Anna Wachtmeister Catholic Organisation for Relief and Redevelopment Aid the Netherlands The interviews and supporting essays show built environment professionals collaborating with post disaster communities as facilitators collaborators and negotiators of land space and shelter rather than as save the world modernists as often portrayed in the design media The goal is social and physical reconstruction as a collaborative process involving a damaged community and its local culture environment and economy not just shelter projects that build houses but leave no economic footprint or longer term community infrastructure What defines and unites the architects interviewed for Humanitarian Architecture is their collective belief that through a consultative process of spatial problem solving the design profession can contribute in a significant way to the complex post disaster challenge of rebuilding a city and its community
