Classification Key for Insect Orders

To identify the insects shown below, use the dichotomous key which consists of a series of paired statements. To identify an insect order, decide which statement in the first pair describes that insect. Go to the pair of statements indicated by the number following your choice. Again, decide which statement describes the insect. If the statement is followed by the name of the insect order, you have identified the insect. If the statement is followed by a number, go to that pair of statements to make another choice. Continue the process until you have identified the insect. Using the key, all of the insects can be identified as an order.

Williams, David R. Lauck, 1982 **Unseen City** Nathanael Johnson, 2016-04-05 It all started with Nathanael Johnson s decision to teach his daughter the name of every tree they passed on their walk to day care in San Francisco This project turned into a quest to discover the secrets of the neighborhood s flora and fauna and yielded more than names and trivia Johnson developed a relationship with his nonhuman neighbors Johnson argues that learning to see the world afresh like a child shifts the way we think about nature Instead of something distant and abstract nature becomes real all at once comical annoying and beautiful This shift can add tremendous value to our lives and it might just be the first step in saving the world No matter where we live city country oceanside or mountains there are wonders that we walk past every day Unseen City widens the pinhole of our perspective by allowing us to view the world from the high altitude eyes of a turkey vulture and the distinctly low altitude eyes of a snail The narrative allows us to eavesdrop on the comically frenetic life of a squirrel and peer deep into the past with a ginkgo biloba tree Each of these organisms has something unique to tell us about our neighborhoods and chapter by chapter Unseen City takes us on a journey that is part nature lesson and part love letter to the world s urban jungles With the right perspective a walk to the subway can be every bit as entrancing as a walk through a national park *Miniature Lives* Michelle Gleeson, 2016-03-01 We can t avoid insects They scurry past us in the kitchen pop up in our gardens or are presented to us in jars by inquisitive children Despite

The communities of organisms that live beneath them are little noticed and even less studied yet the potential for ecological work here is great. Some of the animals are relatively large and frequently not difficult to find. They exhibit a wide range of lifestyles from slow slugs or snails to very fast centipedes from generalist to specialist feeders and from herbivores to carnivores. With chapters covering the cryptosphere, environment, species groups, identification guidelines and ideas for further research, this much expanded and updated new edition also includes extensive, easy to use, comprehensively illustrated keys.
