Diet And Health Scientific Perspectives:

Diet and Health Walter J. Veith,1998 Diet and Health Walter J. Veith,1993* *Endocrine Disruptors: A Scientific Perspective* ,1999 National Academy of Sciences' Reports on Diet and Health--are They Credible and Consistent? United States. General Accounting Office,1984 Health, Food and Social Inequality Carolyn Mahoney,2015-02-20

Health Food and Social Inequality investigates how vast amounts of consumer data are used by the food industry to enable the social ranking of products food outlets and consumers themselves and how this influences food consumption patterns This book supplies a fresh social scientific perspective on the health consequences of poor diet Shifting the focus from individual behaviour to the food supply and the way it is developed and marketed it discusses what is known about the shaping of food behaviours by both social theory and psychology Exploring how knowledge of social identities and health beliefs and behaviours are used by the food industry Health Food and Social Inequality outlines for example how commercial marketing firms supply food companies with information on where to locate snack and fast foods whilst also advising governments on where to site health services for those consuming such foods disproportionately Giving a sociological underpinning to Nudge theory while simultaneously critiquing it in the context of diet and health this book explores how social class is an often overlooked factor mediating both individual dietary practice and food marketing strategies This innovative volume provides a detailed critique of marketing and food industry practices and places class at the centre of diet and health It is suitable for scholars in the social sciences public health and marketing

Transforming food systems: ethics, innovation and responsibility Donald Bruce,Ann Bruce,2023-08-14 Feeding the world s growing population in ways that are effective ethical and socially just and protect the natural systems on which all life depends is one of the greatest challenges facing humanity It forms the theme of this book of papers of the 2022 Edinburgh conference of the European Society for Agricultural and Food Ethics EURSAFE The dramatic increases in the cost of energy scarcities in resources and people stemming from the COVID 19 pandemic and international conflict have brought home the vulnerability of our interlinked human systems at all levels Climate change poses deeper longer term threats Global competition drives fine tuned and efficient systems but time proven local practices may show better resilience in such uncertain futures The book reflects the sheer diversity of approaches and responses to these challenges across a wide range of academic disciplines provoking us to look at the issues in new ways They reflect the varied standpoints of producers retailers regulators farmers vets communities and citizens The challenge to reach net zero carbon is addressed in papers assessing livestock systems grasslands land use and rewilding food choices meat eating and alternatives Innovations such as genome editing uses of seaweed and the use of data pose both possibilities and challenges Animal ethics is a prominent theme with a range of papers on animal human relations animal use in research and veterinary ethics
