BOOK JACKET RLG Digital Image Access Project Patricia A. McClung, 1995 A Modular Organization of a Digital Integrating Computer for the Numerical Solution of Differential Equations Eckhard Josef Schulz, Stanford University Stanford Electronics Laboratories, 1971 The automatic solution of differential equations may be accomplished by either modeling the equation on an analog computer or by solving it numerically on a general purpose computer Both methods are cumbersome and have the disadvantages of low accuracy and slow speed respectively The development of the digital differential analyzer promised a machine with improved accuracy and speed The difficulty in programming and the reliance on complex switching networks or patch boards brought about by ever increasing parallelism however have prevented the full exploitation of the DDA capabilities A modular machine structure employing serial parallel processing and using incremental integration as its basic algorithm has been developed The system consists of self contained modules which may be operated independently or may be operated independently or may be combined to solve numerically one or more

differential equations Modularity and serial parallel processing simplify the communication methods within and between modules to permit automatic programming the hardware requirements are reduced as in serial processing but the iteration time cannot exceed a fixed maximum regardless of the problem Author *Digital Certificates* Jalal Feghhi, Jalil Feghhi, Peter Williams, 1999 Digital certificates a new form of electronic ID is a new security technology that establishes a digital identity for a person or a company and guarantees the authenticity of information delivered over the Web or via email This title explores all of the critical aspects of digital certificates in detail and provides basic information on cryptography The CD ROM contains a complete system for controlling access to information on the Internet based on digital certificate technology
