Willms, 2017-08-28 For nearly one hundred years basketball has been an important part of Japanese American life Women's basketball holds a special place in the contemporary scene of highly organized and expansive Japanese American leagues in California in part because these leagues have produced numerous talented female players Using data from interviews and observations Nicole Willms explores the interplay of social forces and community dynamics that have shaped this unique context of female athletic empowerment As Japanese American women have excelled in mainstream basketball they have emerged as local stars who have passed on the torch by becoming role models and building networks for others Serving Empire, Serving Nation Jason Freitag, 2009 James Tod's *Annals and Antiquities of Rajasthan* was crucial in forming the modern image of the Rajput a princely martial caste resident in India's northwest desert This book explores the relationships

between the political power of the British imperial state the construction of historical memories in the late nineteenth and early twentieth centuries and the uses of these constructions by European writers and Indian nationalist elites The case of the Rajputs demonstrates how imperial histories reflected Indian social processes and pre colonial forms of knowledge interpreted India for the world outside and for Indians themselves This book explores the multiple discourses within Tod's Rajasthan and European Orientalism to show how intricately coded the British Empire was and historically remains

The Ethics of Total Confinement Bruce A. Arrigo, Heather Y. Bersot, Brian G. Sellers, 2011-06-29 In three parts this volume in the AP LS series explores the phenomena of captivity and risk management guided and informed by the theory method and policy of psychological jurisprudence The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent conditions of control These conditions impose barriers to justice and set limits on citizenship for one and all Situated at the nexus of political social theory mental health law and jurisprudential ethics the book examines and critiques constructs such as offenders and victims self and society therapeutic and restorative health harm and community So too are

three total confinement case law data sets on which this analysis is based The volume stands alone in its efforts to systematically diagnose the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting 1 the rights of juveniles found competent to stand criminal trial the mentally ill placed in long term disciplinary isolation and sex offenders subjected to civil detention and community re entry monitoring 2 the often unmet needs of victims and 3 the demands of an ordered society Carefully balancing sophisticated insights with concrete and cutting edge applications the book concludes with a series of provocative yet practical recommendations for future research and meaningful reform within institutional practice programming and policy The Ethics of Total Confinement is a thought provoking and timely must read for anyone interested in the ethical and legal issues regarding madness citizenship and social justice It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us Instead the path forward must run through a return to the ethical and psychological roots of security and justice The Ethics of Total Confinement is a quantum step forward in defining and advancing that path Jonathan Simon Adrian A Kragen Professor of Law Jurisprudence and Social Policy Program UC Berkeley School of Law This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness It focuses on three outcast groups juveniles tried as adults people with mental illness subjected to hospitalization and sex offenders committed as dangerous and based on an innovative analysis of the relevant caselaw and empirics shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest most uninformed fears Relying on Aristotelian philosophy therapeutic and restorative principles and commonsense justice the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing Christopher Slobogin Milton Underwood Professor of Law Vanderbilt University Law School The Ethics of Total Confinement A Critique of Madness Citizenship and Social Justice deepens our understanding of how our legal system justifies its treatment of those it confines By bridging gaps among relevant disciplines the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological ethical or justice based standards The book s provocative conclusions and recommendations offer much food for thought and suggest potential directions for action Dennis Fox Emeritus Associate Professor of Legal Studies and Psychology University of Illinois at Springfield The Ethics of Total Confinement shows how captivity diminishes the keepers and the kept It is a book that synthesises in creative new ways reformist visions of justice virtue and the cultivation of habits of character This is profound work that opens new paths to dignity healing and social justice John Braithwaite Australian Research Council Federation Fellow Australian National University The Ethics of Total Confinement offers a useful and wide ranging perspective grounded in psychological jurisprudence With its emphasis on the harm done to those most vulnerable to

extremes of risk management this volume makes a welcome addition to the literature on confinement Lorna Rhodes
 Professor Department of Anthropology University of Washington The provocative thesis of this book develops psychological
 jurisprudence to conceptualize the ethics of existing total confinement practices aspiring to greater justice and human
 flourishing for all A timely intervention of this kind is most welcome George Pavlich Associate Vice President Research
 Professor of Law and Sociology University of Alberta *Psychosis, Psychiatry and Psychospiritual Considerations* Brian
 Spittles, 2022-11-29 A phenomenological and spiritual investigation of anomalous mental experiences From a psychiatric
 perspective psychosis is generally viewed as a psychopathological and often incomprehensible mental disorder of biological
 cause In his book Brian Spittles argues that this represents a rather limited view and that a psychospiritual investigation of
 psychosis may enable a better understanding of its nature and determinants His aim is not to negate the discipline of
 psychiatry but to demonstrate the viability and efficacy of incorporating psychospiritual considerations into psychosis
 research Within these pages Spittles challenges several core psychiatric beliefs and calls for the discipline to extend its
 investigative parameters beyond the limited epistemological bounds of materialism The book uses an open ended heuristic
 approach that enables the systematic examination and critical appraisal of views on psychosis across the materialist to
 metaphysical spectrum This is structured in four Focal Settings that sequentially examine the construal of psychosis within
 different paradigms of psychospiritual understanding which provide a historical overview of evolving understandings of
 psychosis within the tradition of psychiatry in which psychospiritual matters are generally not considered **The Mexican
 Cinema of Darkness** Doyle Greene, 2012-09-21 Following the national and international upheaval and tragedy in 1968
 Mexican trash cinema began to shift away from the masked wrestler genre and towards darker more explicit films and
 disturbing visions of the modern world films which can be called avant exploitation This work covers six of those films El
 Topo Mansion of Madness Alucarda Guyana Crime of the Century Birds of Prey and Santa Sangre *Comic-book Superstars*
 Don Thompson, Maggie Thompson, 1993 Meet the writers artists colorists and letters who bring the stories to life This book
 offers wide page margins for autographs and sketches It s perfect for comics conventions signings and store appearances
 Social Theory, The State And Modern Society Marinetto, Michael, 2007-09-01 In recent years there has been a
 proliferation of approaches which have redefined our understanding of political power and the state These contemporary
 state theories have philosophical and theoretical antecedents that can be traced to post classical social and political thought
 their influences can be traced to feminism structuralism and poststructuralism cultural theory network analysis and
 globalisation theory The classical theories of Marx Weber and Durkheim are altogether less important in contemporary state
 theory In Social Theory the State and Modern Society Mike Marinetto considers the philosophical and theoretical heritage of
 modern state theory and then critiques the theories that have evolved from this legacy Topics covered include The
 poststructural state Governance and the decentred state The gendered state The cultural turn in state theory The state in a

global context The past present and future of state theory Social Theory the State and Modern Society is key reading for students of Sociology Politics and Public Policy It is also of interest to researchers and academics with an interest in state theory R.D. Laing: His Work and its Relevance for Sociology (RLE Social Theory) Martin Howarth-Williams, 2014-08-07 This study by a sociologist provides the most rigorous and comprehensive review to appear so far of R D Laing s work and theoretical development Martin Howarth Williams considers that Laing s insights into such controversial issues as the divided self and the politics of the family are of an importance that transcends their basis in clinical psychiatry and that they have a special significance for sociology Using the Progressive Regressive Method of Jean Paul Sartre the author illuminates the internal coherence of Laing s aims through the various stages of his work and shows how his ideas are shaped by consistent philosophic presuppositions and influences underlying his work To give as complete an account as possible of Laing s interests and to relate them to the broad stream of his thought the author explores Laing s involvement in other non psychiatric realms especially politics religion and eastern mysticism Material has been secured from a wide variety of recent sources which include interviews films TV appearances and the author s own personal recollections of informal talks given by Laing In the final section of the book Martin Howarth Williams isolates the concept of Intelligibility which he demonstrates to be the unifying theme central to Laing s theory and shows how this can be used as the basis for a critique of recent developments in sociological theory as well as a starting point towards a genuinely dialectical sociology *The Illustrated London News* ,1856 *Science and society in southern Africa* Saul Dubow, 2017-03-01 This collection dealing with case studies drawn from South Africa Zimbabwe Mozambique and Mauritius examines the relationship between scientific claims and practices and the exercise of colonial power It challenges conventional views that portray science as a detached mode of reasoning with the capacity to confer benefits in a more or less even handed manner That science has the potential to further the collective good is not fundamentally at issue but science can also be seen as complicit in processes of colonial domination Not only did science assist in bolstering aspects of colonial power and exploitation it also possessed a significant ideological component it offered a means of legitimating colonial authority by counter poisoning Western rationality to native superstition and it served to enhance the self image of colonial or settler elites in important respects This innovative volume ranges broadly through topics such as statistics medicine eugenics agriculture entomology and botany
