

Magic Bullet Theory /Hypodermic Needle Theory

The "magic bullet" and "hypodermic needle" models originate from Harold Lasswell's 1927 book, Propaganda Technique in the World War. It states that media message is very powerful and injects into the mind of audience in such a way as a bullet acts rapidly on the body.

Two step Flow Theory

In the 1940s, Lazarsfeld disproved the "magic bullet" theory and "hypodermic needle model theory" through elections studies in "The People's Choice".[10] Lazarsfeld and colleagues executed the study by gathering research during the election of Franklin D. Roosevelt in 1940. The study was conducted to determine voting patterns and the relationship between the media and political power. Lazarsfeld discovered that the majority of the public remained unfazed by propaganda surrounding Roosevelt's campaign. Instead, interpersonal outlets proved more influential than the media. Therefore, Lazarsfeld concluded that the effects of the campaign were not all powerful to the point where they completely persuaded "helpless audiences", a claim that the Magic Bullet, Hypodermic Needle Model, and Lasswell asserted. These new findings also suggested that the public can select which messages affect and don't affect them.

Adopting Information Systems Perspectives from Small Organizations Özgün Imre, 2017-12-08 Why do organizations adopt information systems Is it just

because of financial reasons or concerns for efficiency. Or is it due to external pressures such as competitor pressure that an organization adopts an information system? And how does the adoption take place? Is it a linear process or is the process one of conflicts? Does a specific person govern this process or do we have multiple parties involved? What happens if these conflicts occur among those involved? How does the organization move on and achieve a successful information system adoption? By investigating two organizations, one international academic journal and one South American manufacturing company, this thesis aims to investigate the whys and hows of information system adoption and aims to contribute to the discourse on information system adoptions in small organizations, an often underrepresented segment in information system adoption literature. By adopting different theoretical lenses throughout the five research papers included, this body of work suggests that even when seemingly simple information system adoptions can become rather complex. The cases reveal that the role of information systems and issues related to information system adoptions are often not well thought out in the early days of the organization. The actors' understandings of adoption and consequences mature and the information systems become more intertwined. Common use of stakeholder theory introduces general stakeholders and their interaction with the focal organization. The cases reveal that the adoption process involves multiple actors even within what would initially appear as a stakeholder and that those actors can be in conflict with each other. These conflicts often lead to negotiations and the cases reveal that these negotiations are opportunities of learning; the actors engage with the information system and with each other, gaining new knowledge about the issues at hand. The dissertation argues that there are various social worlds in information system adoptions and various factors ranging from organizational structure to social norms that often affect why and how the organization undergoes an adoption process. The multiple power relations and divergent interests of stakeholders in these adoption processes and how information systems affect other parts of the organization reinforce the need for a well thought out, flexible and reflexive approach to information system adoptions.

Treason From Within Donald T Phillips, 2023-10-03

The First Comprehensive Treatment of the Kennedy Assassination

The US government lied to the American people about President Kennedy's death. But ironically it was the American people who solved the crime. Over the past half century, hundreds of researchers investigated one or more parts of the murder, often using their own expertise such as photography, computers, science, medical expertise and analytical skills. Taken together, their detailed work illuminated what really happened. Author Donald T Phillips has been following the Kennedy assassination since it happened. This book begins at the end of World War II and concludes when the Warren Commission was formed. Revealed along the way is the truth about the Bay of Pigs, the Cuban Missile Crisis, the ambush in Dealey Plaza and JFK's fraudulent autopsy. During his two years and eight months in office, President Kennedy prevented the US government from instigating a war that could have involved nuclear weapons in Vietnam, Laos, Berlin, the Soviet Union and Cuba. He was leading the nation away from armed conflict, ending the Cold War and setting the stage for a lasting peace with all nations. In doing so, however, JFK was

threatening long established kopek structures within the government So on November 22 1963 in broad daylight they shot him in the back and blew his brains out It was a pre meditated deliberate willful act of murder with malice aforethought And they got away with it No one who participated in the crime was ever brought to justice Treason From Within answers the questions Who killed President Kennedy Why was he killed How was he killed

resource for all who want to understand the dynamics of HIT projects and why some fail and others succeed *Full Spectrum Dominance* Maria Ryan, 2019-09-24 America's war on terror is widely defined by the Afghanistan and Iraq fronts. Yet as this book demonstrates both the international campaign and the new ways of fighting that grew out of it played out across multiple fronts beyond the Middle East. Maria Ryan explores how secondary fronts in the Philippines, sub-Saharan Africa, Georgia, and the Caspian Sea Basin became key test sites for developing what the Department of Defense called full spectrum dominance: mastery across the entire range of possible conflict from conventional through irregular warfare. *Full Spectrum Dominance* is the first sustained historical examination of the secondary fronts in the war on terror. It explores whether irregular warfare has been effective in creating global stability or if new terrorist groups have emerged in response to the intervention. As the U.S. military, Department of Defense, White House, and State Department have increasingly turned to irregular capabilities and objectives, understanding the underlying causes as well as the effects of the quest for full spectrum dominance become ever more important. The development of irregular strategies has left a deeply ambiguous and concerning global legacy.

Propaganda & Persuasion, The Theory and Practice of Microcredit Wahiduddin Mahmud, S. R. Osmani, 2016-10-04 The remarkable speed at which microcredit has expanded around the world in the last three decades has piqued the curiosity of practitioners and theorists alike. By developing innovative ways of making credit available to the poor, the idea of microcredit has challenged many traditional assumptions about both poverty reduction strategies and financial markets. While this has encouraged new theorising about how microcredit works, the practice of microcredit has itself evolved often in unpredictable ways, outpacing the development of theory. *The Theory and Practice of Microcredit* aims to remedy this imbalance, arguing that a proper understanding of the evolution of practice is essential both for developing theories that are relevant for the real world and for adopting policies that can better realize the full potential of microcredit. By drawing upon their first-hand knowledge of the nature of this evolution in Bangladesh, the birthplace of microcredit, the authors have pushed the frontiers of current knowledge through a rich blend of theoretical and empirical analysis. The book breaks new ground on a wide range of topics, including the habit-forming nature of credit repayment, the institutional strength and community-based role of microfinance institutions, the relationships between microcredit and informal credit markets, the pattern of long-term participation in microcredit programmes, and the variety of loan use, the scaling up of microenterprises beyond subsistence, the missing middle in the credit market, and the prospects of linking micro-entrepreneurship with economic development. The book will be of interest to researchers, development practitioners, and university students of Development Economics, Rural Development, or Rural Finance, as well as to public intellectuals.

Merskin, 2019-11-12 The reference will discuss mass media around the world in their varied forms: newspapers, magazines, radio, television, film, books, music, websites, and social media, and will describe the role of each in both mirroring and shaping society.
