

A woman with brown hair tied back, wearing a white top, is seen from the side, looking out over a coastal city at sunset. The city features a mix of greenery and buildings, with a prominent yellow structure in the middle ground. The sea is a deep blue, and the sky is a soft orange and yellow.

Making Our Cities Attractive And Sustainable European:

Making Our Cities Attractive and Sustainable ,2010 Recoge Clean and healthy Green and pleasant Efficient and sustainable Well managed and democratic EU funding available for cities **Decentralization in Environmental Governance** Christian Zuidema,2016-10-04 Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how governance renewable might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions It does so by revitalizing the idea that we can contingently relate alternative planning approaches to the circumstances encountered It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty complexity and socially constructed knowledge This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance Next to its theoretical ambitions Decentralization in Environmental Governance is practical in offering a constructive critique on current processes of governance renewal in European environmental governance

Urban Change and Regional Development at the Margins of Europe Ignazio Vinci,Paula Russell,2022-07-28 Since the beginning of the 1990s regions and urban areas have become a primary target of EU Cohesion Policy For a number of European cities especially in the less developed regions this has resulted in a unique opportunity for the implementation of extensive development projects as well as delivering innovations in urban policy and local governance Through the detailed observation of planning processes which took place in four European cities Porto PT Malaga ES Palermo IT and Thessaloniki EL this book explores the different ways that EU intervention can affect the policy process locally from the regeneration of decayed neighbourhoods and the creation of key services for improving the quality of life to the establishment of new governance relations and increasing the institutional capacity in local government The book also provides a critical reflection on the impact of EU urban policy in reducing regional disparities and the extent to which Cohesion Policy has helped cities to open new pathways for local development With a special focus on the EU s marginal regions this book is a guide to understanding how EU policy has affected urban change and local development across Europe The chapters in this book were originally published as a special issue of the journal Urban Research Practice Mobilities, Tourism and Travel Behavior Leszek Butowski,2018-01-17 The notion of mobilities when looked at from a practical point of view turns out to cover different kinds of human activity It is not surprising then that when approached from an academic perspective it

reveals enormous potential for interdisciplinary research which has proven extremely attractive to many scholars from different continents disciplines and schools of academic inquiry The scholars in this volume focus on the specific aspects of mobilities namely tourism and travel behavior but approach them from a plethora of positions Such a myriad of perspectives is bound to be challenging in methodological terms but it seems there is a growing agreement as to the worthiness of this interdisciplinary research By means of combining various approaches researchers obtain access to a fascinating and increasingly ubiquitous phenomenon of contemporary human mobility
