Donald N. Stengel, 2011-06-30 If you have good economic principles then more than likely you are making good business decisions. Although economics is sometimes dismissed as a discourse of practical relevance to only a relatively small circle of academicians and policy analysts who call themselves economists, sound economic reasoning benefits any manager of a business whether they are involved with production and operations, marketing, finance or corporate strategy. This highly respected text will help you and any business manager with managerial economics which is the application of microeconomics to business decisions. Inside you will learn about the key relationships between price, quantity, cost, revenue and profit which are detailed for an individual firm in the form of simple conceptual models. The book includes key elements from the economics of consumer demand and the economics of production. It also discusses economic motivations for expanding a business and contributions from economics for improved organization of large firms as well as market price, quantity, equilibrium, competitive behavior and the role of market structure on market equilibrium and competition. It concludes by considering market regulation in terms of the generic problems that create the need for regulation and possible remedies for those problems.

Television Production in Transition Gillian Doyle, Richard Paterson, Kenny Barr, 2021-05-03 Focusing on the growing power of transnational media corporations in an increasingly globalized environment for distribution of television content and on the effects of mergers and acquisitions involving local and independent television production companies, this book examines how current and recent restructurings in ownership across the television industry reflect changing business models, how they affect creativity and diversity of television output and to what extent they call for new approaches to regulation and policy. Based on a major study of the UK production sector as a case study, it offers a unique analysis of wider transformations in ownership affecting the television production industry worldwide and of their economic
