Broadband In Brazil Peter Knight, Flavio Feferman, Nathalia Foditsch, The Internet has been a reality in Brazil for more than 20 years Its growth has been encouraged by the government by large telecom companies and by small and medium Internet service providers as well as by rapidly increasing demand The achievements to date are clear but almost

half the population is still not participating in the digital world Furthermore the cost of broadband is still high and its quality should be improved so that it will be possible to take advantage of all the benefits it can bring whether related to health education or even the exercise of political rights It is necessary therefore that the Brazilian Internet be fast reliable and accessible This book brings together 23 specialists in various areas related to broadband specialists who wanted to discuss Brazil s public policies and regulations as well as the progress and challenges related to expanding access to broadband Internet service The 16 chapters also address the evolution of the country s broadband infrastructure including experiences of entrepreneurship and public private partnerships This debate is fundamental for Brazil s technological economic and social progress
