Being Brains Fernando Vidal, Francisco Ortega, 2017-07-04 This interesting informative and provocative book explores the pervasive influence of neuroscience and the view that we are essentially our brains History and Philosophy of the Life Sciences Being Brains offers a critical exploration of neurocentrism the belief that we are our brains which came to prominence in the 1990s Encouraged by advances in neuroimaging the humanities and social sciences have gravitated toward the brain as well developing neuro subspecialties in fields such as anthropology aesthetics education history law sociology and theology Even in the business world dubious enterprises such as neuromarketing and neurobics have emerged to take advantage of the heightened sensitivity to all things neuro While neither hegemonic nor monolithic the neurocentric view embodies a powerful ideology that is at the heart of some of today's most important philosophical ethical scientific and political debates Being Brains examines the internal logic of this new ideology as well as its genealogy and its main contemporary incarnations Being Brains was chosen as the 2018 Outstanding Book in the History of the Neurosciences by the International Society for the History of the Neurosciences

The quiet contemporary American novel Rachel Sykes, 2017-12-01 This book explores the concept of quiet an aesthetic of narrative driven by reflective principles and argues for the term's application to the study of contemporary American fiction In doing so it makes two critical interventions Firstly it maps the neglected history of quiet fictions arguing that from Hester Prynne to Clarissa Dalloway from Bartleby to William Stoner the Western tradition is filled with quiet characters Secondly it asks what it means for a novel to be quiet and how we might read for quiet in an American literary tradition that critics so often describe as noisy Examining recent works by Marilynne Robinson Teju Cole and Ben Lerner among others the book argues that quiet can be a multi faceted state of existence one that is communicative and expressive in as many ways as noise but filled with potential for radical discourse by its marginalisation as a mode of expression

Mindful Aesthetics Chris Danta, Helen Groth, 2013-11-07 In the last few decades literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind This cognitive turn has been equally generative and contentious While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present critics have questioned its literalism and selective borrowing of scientific authority Mindful Aesthetics presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice This collection contributes to the forging of a new interdisciplinarity to paraphrase Alan Richardson's recent preface to the Neural Sublime that is more concerned with

addressing how rather than why we should navigate the increasingly narrow gap between the humanities and the sciences

The Creative Writer's Mind Nigel Krauth, 2022-05-10 What goes on in creative writers heads when they write What can cognitive psychology neuroscience literary studies and previous research in creative writing studies tell creative writers about the processes of their writing mind Creative writers have for centuries undertaken cognitive research Some described cognition in vivid exegetical essays but most investigated the mind in creative writing itself in descriptions of the thinking of characters in fiction poetry and plays The inner voicings and inner visualising revealed in Greek choruses in soliloquies in stream of consciousness narratives are creative writers research results from studying their own cognition and the thinking of others The Creative Writer's Mind is a book for creative writers it sets out to cross the gap between creative writing and science between the creative arts and cognitive research

Power in Language, Culture, Literature and Education

Marta Degani, Werner Delanoy, 2023-04-24 In one of the contributions to this edited volume an interviewee argues that English is power For researchers in the field of English Studies this raises the questions of where the power of English resides and which types and practices of power are implied in the uses of English Linguists scholars of literature and culture and language educators address aspects of these questions in a wide range of contributions The book shows that the power of English can oscillate between empowerment and subjection on the one hand enabling humans to develop manifold capabilities and on the other constraining their scope of action and reflection In this edited volume a case is made for self critical English Studies to be dialogic empowering and power critical in approach
