Brown, Brindha Gunasingham, Asjeet Lamba, Dr Frank Elston, 2019-11-19 This first Asia Pacific edition of Reilly Brown's *Investment Analysis and Portfolio Management* builds on the authors' strong reputations for combining solid theory with practical application and has been developed especially for courses across the Australia New Zealand and Asia Pacific regions. Responses of the Stock Market to Macroeconomic Announcements Across Economic States Zuli Hu, Li Li, 1998-05-01 Is the stock market responsive to macroeconomic news? This paper employs the daily returns of the Dow Jones Industrial Index, the S P 500 index, the Russell 1000 index and the Russell 2000 index to examine stock market reactions to a broad list of macroeconomic announcements including money supply, inflation, employment, housing starts and trade balances etc. Several announcements concerning real economic activity that have received little attention in previous research are shown to have a significant impact on stock prices. The paper also presents preliminary evidence for the different reaction to macroeconomic news by small cap stocks and large cap stocks. *Macroeconomics and Finance* Stanley Fischer, Robert C. Merton, 1984 The treatment of the stock market in finance and macroeconomics exemplifies many of the important

differences in perspective between the two fields In finance the stock market is the single most important market with respect to corporate investment decisions In contrast macroeconomic modelling and policy discussion assign a relatively minor role to the stockmarket in investment decisions This paper explores four possible explanations for this neglect and concludes that macro analysis should give more attention to the stock market Despite the frequent jibe that the stockmarket has forecast ten of the last six recessions the stock market is in fact a good predictor of the business cycle and the components of GNP We examine the relative importance of the required return on equity compared with the interest rate in the determination of the cost of capital and hence investment In this connection we review the empirical success of the Q theory of investment which relates investment to stock market evaluations of firms One of the explanations for the neglect of the stock market in macroeconomics may be the view that because the stock market fluctuates excessively rational managers will pay little attention to the market in formulating investment plans This view is shown to be unfounded by demonstrating that rational managers will react to stock price changes even if the stock market fluctuates excessively Finally we review the extremely important issue of whether the market does fluctuate excessively and conclude that while not ruled out on a priori theoretical grounds the empirical evidence for such excess fluctuations has not been decisive
