Chapter 5

5.1 - Cost Behavior Patterns

The three types of cost behavior:

- **Variable costs**
 - Describes costs that vary *in total* with changes in volume of activity
 - Direct materials, direct labor, indirect labor, energy costs, etc
 - DM and DL are the most common variable costs.
 - *Total variable costs* change with changes in activity, but *per unit variable cost* remains the same with changes in activity.
- **Fixed costs**
 - Describes costs that are fixed (doesn't change) in total with changes in volume of activity
 - Building rent, insurance, etc
 - *Total fixed costs* do not change with changes in activity, but *per unit fixed cost* does change with changes in activity.
- **Mixed costs**
 - Describes costs that has a mixture of fixed and variable costs
 - Compensation with monthly salary and commission based on sales, etc
 - *Mixed costs* change with changes in activity, and *per unit mixed cost* also changes with changes in activity.

Managers need to understand how costs behave to predict what will happen to *profit* in the *future*.

Carsten Berkau, 2023-09-25 Management Accounting is a textbook for business management study programmes. It covers the international syllabus of cost accounting and controlling on bachelor's and master's levels. Prof. Berkau has more than 25 years of teaching experience in Germany (UAS Osnabrück) and at international universities in South Africa, Malaysia, China, the Netherlands, and South Korea. The textbook strictly follows a case study based approach. All methods are discussed by easily understandable cases. The calculations demonstrate how to apply management accounting step by step. In the first chapters, the case study PENOR PLC about a British windows doors manufacturer explains the differences between financial accounting (IFRSs) and management accounting. In the next following sections, the textbook covers two points of view: 1. a controlling view with budgeting, cost-volume-profit analysis, degree of operating leverage, investment appraisal, mergers and cross-border acquisitions, and risk valuation Monte Carlo Simulation. 2. a cost accounting view that covers management accounting systems, flexible budgeting, cost allocation methods, performance measurement, monitoring, reporting, product calculation, manufacturing accounting, job order and process costing, activity-based costing, target costing, and contribution margin accounting. On the UVK website, numerous exam tasks with complete solutions, further study materials, and links to video clips produced by Prof. Berkau are available for download. **Cost Accounting Problems (With Full Solutions)** ,
