The Rhythm of Modernization: How Values Change over Time Raúl Tormos,2019-11-04 In *The Rhythm of Modernization* Raúl Tormos analyses the pace at which belief systems change across the developed world during the modernization process It is often assumed that value change follows the slow rhythm of generational replacement

This book however reports trends that contradict this assumption in the field of values Challenging Inglehart s modernization theory the transition from traditional to modern values happens much quicker than predicted Many baby boomers who were church going morally conservative materialists when they were young become unchurched and morally tolerant postmaterialists in their later years Using surveys from multiple countries over many years and applying cutting edge statistical techniques this book shows how citizens quickly adapt their belief systems to new circumstances throughout their lives
