The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Concrete Utopianism Gary Wilder, 2022-08-09 Finalist 2022 Big Other Book Award for Nonfiction Never before has it been more important for Left thinking to champion expansive visions for societal transformation Yet influential currents of critical theory have lost sight of this political imperative Provincial notions of places, periods, and subjects obstruct our capacity to invent new alignments and envision a world we wish to see Political imagination is misread as optimism Utopianism is conflated with idealism

Revolutionary traditions of non liberal universalism and non bourgeois humanism are rendered illegible Negative critique becomes an end in itself Pessimism is mistaken for radicalism and political fatalism risks winning the day In this book Gary Wilder insists that we place solidarity and temporality at the center of our political thinking He develops a critique of Left realism Left culturalism and Left pessimism from the standpoint of heterodox Marxism and Black radicalism These traditions offer precious resources to relate cultural singularity and translocal solidarity political autonomy and worldwide interdependence They develop modes of immanent critique and forms of poetic knowledge to envision alternative futures that may already dwell within our world traces of past ways of being knowing and relating that persist within an untimely present or charged residues of unrealized possibilities that were the focus of an earlier generation s dreams and struggles or opportunities for dialectical reversals embedded in the contradictory tendencies of the given order Concrete Utopianism makes a bold case for embracing what Wilder calls a politics of the possible impossible Attentive to the non identical character of places periods and subjects insisting that axes of political alignment and contestation are neither self evident nor unchanging reworking Lenin s call to transform the imperial war into a civil war he invites Left thinkers see beyond inherited distinctions between here and there now and then us and them Guided by the spirit of Marx s call for revolutionaries to draw their poetry from a future they cannot fathom yet must nevertheless invent he calls for practices of anticipation that envision and enact call for and call forth seemingly impossible ways of being together He elaborates a critical orientation that emphasizes the dialectical relations between aesthetics and politics political imagination and transformative practice concrete interventions and revolutionary restructuring past dreams and possible worlds means of struggle and its ultimate aims This orientation requires nonrealist epistemologies that do not mistake immediate appearances with the really real Such epistemologies would allow critics to recognize uncanny and untimely aspects of social life whether oppressive or potentially emancipatory They may help actors to render the world subversively uncanny and untimely They may clear pathways for the kind of critical internationalism and concrete utopianism that Left politics cannot afford to ignore

The Oxford Handbook of the Ends of Empire Martin Thomas, Andrew Thompson, 2018-12-06 The Oxford Handbook of the Ends of Empire offers the most comprehensive treatment of the causes course and consequences of the ends of empire in the twentieth century The volume s contributors convey the global reach of decolonization with chapters analysing the empires of Western Europe Eastern Europe China and Japan The Handbook combines broad regional treatments of decolonization with chapter contributions constructed around particular themes or social issues It considers how the history of decolonization is being rethought as a result of the rise of the new imperial history and its emphasis on race gender and culture as well as the more recent growth of interest in histories of globalization transnational history and histories of migration and diaspora humanitarianism and development and human rights The Handbook in other words seeks to identify the processes and commonalities of experience that make decolonization a unique historical phenomenon with a lasting

resonance In light of decades of historical and social scientific scholarship on modernization dependency neo colonialism failed state architectures and post colonial conflict the obvious question that begs itself is when did empires actually end In seeking to unravel this most basic dilemma the Handbook explores the relationship between the study of decolonization and the study of globalization It connects histories of the late colonial and post colonial worlds and considers the legacies of empire in European and formerly colonised societies "This Shipwreck of Fragments" Li-Chun Hsiao,2009-10-02 In the light of and in response to the popular perception of the Caribbean as an epitome of cultural hybridity and improvisation this book seeks to further examine Caribbean cultural identities along the lines of race class nationalism and history Drawing on a variety of genres of literature and popular music the present volume includes not only essays that stress the shaping and reshaping of Afro Caribbean cultural identities and the significance of hybridization but also those that think against the grain and pursue questions which have not received enough critical attention This latter task can be seen in the attempt to probe the phenomenon that the Caribbean s image as a tropical getaway in metropolitan popular imaginations tends to eclipse its troubled pasts traumatic memories and current and recurrent problems which elude the rhetoric of cultural hybridity presupposing instead a certain non conflictual diversity or racial equality in the relatively innocuous realm of culture Although nuanced among themselves on certain issues the individual chapters together highlight a body of work which is distinct from the bulk of Anglo American academic productions on the Caribbean as the majority of the textual and cultural materials treated here come from either the Hispanic or Francophone Caribbean Teaching Representations of the French Revolution Julia Douthwaite Viglione,Antoinette Sol,Catriona Seth,2019-08-01 Offers techniques for teaching literature of the French Revolution in college courses including considerations of the revolution s effects on modern ideas republicanism and human rights la cit and Charlie Hebdo along with comparative approaches involving Germany Greece Haiti Italy Latin America and Spain Provides bibliographical resources a timeline and filmography **A Companion to Latin American Literature and Culture** Sara Castro-Klaren,2013-03-21 A COMPANION TO LATIN AMERICAN LITERATURE AND CULTURE The work contains a wealth of information that must surely provide the basic material for a number of study modules It should find a place on the library shelves of all institutions where Latin American studies form part of the curriculum Reference Review In short this is a fascinating panoply that goes from a reevaluation of pre Columbian America to an intriguing consideration of recent developments in the debate on the modern and postmodern Summing Up Recommended CHOICE A Companion to Latin American Literature and Culture reflects the changes that have taken place in cultural theory and literary criticism since the latter part of the twentieth century Written by more than thirty experts in cultural theory literary history and literary criticism this authoritative and up to date reference places major authors in the complex cultural and historical contexts that have compelled their distinctive fiction essays and poetry This allows the reader to more accurately interpret the esteemed but demanding literature of authors such as Jorge Luis Borges Mario Vargas Llosa

Octavio Paz and Diamela Eltit Key authors whose work has defined a period or defied borders as in the cases of Sor Juana Inés de la Cruz César Vallejo and Gabriel García Márquez are also discussed in historical and theoretical context Additional essays engage the reader with in depth discussions of forms and genres and discussions of architecture music and film This text provides the historical background to help the reader understand the people and culture that have defined Latin American literature and its reception Each chapter also includes short selected bibliographic guides and recommendations for further reading

Frankétienne and Rewriting Rachel Douglas, 2009-06-16 *Rewriting* in the context of critical work on Caribbean literature has tended to be used to discuss revisionism from a variety of postcolonial perspectives such as rewriting history or

rewriting canonical texts By shifting the focus to how Caribbean writers return to their own works in order to rework them this book offers theoretical considerations to postcolonial studies on literariness in relation to the near obsessive degree of rewriting to which Caribbean writers have subjected their own literary texts Focusing specifically on FrankZtienne this book offers an overview of how the defining aesthetic and thematic components of FrankZtienne s major works have emerged over the course of his forty year writing career It reveals the marked development of key notions guiding his literary creation since the 1960s and demonstrates that rewriting illustrates the central aesthetic of the Spiral which has always shaped his Iuvre It is the book argues the constantly moving form of the Spiral which FrankZtienne explores through his constant reworking of his previously written texts FrankZtienne and Rewriting negotiates between the literary and material ends of the burgeoning field of postcolonial studies arguing that literary characteristics in FrankZtienne connect with changing political social economic and cultural circumstances in the Haiti he rewrites
