Morality Ethics And Gifted Minds:

Morality, Ethics, and Gifted Minds Don Ambrose, Tracy Cross, 2009-04-21 *Morality Ethics and Gifted Minds* explores much of the current wisdom on ethics and morality while developing new perspectives on the ethical dimensions of high ability. Prominent authors from diverse disciplines are brought together recognizing that no single discipline can capture the essence and entirety of nettlesome complex multidimensional moral issues. More specifically, the book explores new dimensions of ethics and morality, magnifies the importance of applying highly intelligent minds to ethical issues while developing ways to strengthen the ethical awareness of the creative and gifted and brings diverse interdisciplinary perspectives to bear on these issues. *Confronting Dogmatism in Gifted Education* Don Ambrose, Robert Sternberg, Bharath Sriraman, 2013-06-17 This book looks beyond the predominant conceptual frameworks that dominate thinking about giftedness and talent. Leading thinkers in the field of gifted education question fundamental assumptions about high ability and probe the larger contexts that influence gifted education.

Executive Function in Education, Second Edition Lynn Meltzer, 2018-02-19 This groundbreaking volume now revised and updated has given thousands of educators and clinicians a deeper understanding of executive function (EF) processes in typically developing children and those with learning difficulties and developmental disabilities. The book elucidates how PreK-12 students develop such key capacities as goal setting, organization, cognitive flexibility, working memory, and self-monitoring. Leading experts in education, neuroscience, and psychology explore the links between EF and academic performance and present practical applications for assessment and instruction. Exemplary practices for supporting students with EF difficulties in particular content areas (reading, writing, and math) are reviewed. New to This Edition: Expanded coverage of reading; chapters on recent fMRI research findings, working memory, and reading and self-regulation; and reading comprehension. Chapter on early childhood; Chapter on embedding EF strategies in the curriculum. Updated throughout with a decade's worth of significant advances in research, theory, and educational best practices. See also Meltzer's authored book *Promoting Executive Function in the Classroom* which provides easy-to-implement assessment tools, teaching techniques, and activities, and planning aids.

Ambrose, Bharath Sriraman, Kathleen M. Transformational Giftedness for Education Robert J Sternberg,Don Ambrose,Sareh Karami,2022-04-23 This handbook examines what education would look like if it prepared gifted students to transform the world to make it a better place for all not just for those who receive extra resources from schools in return for being labeled as gifted The editors explore how transformationally gifted people can seek to make the world a better and more just place they try to make a positive meaningful and possibly enduring contribution to changing things in the world that are not working They do not view giftedness merely as a transaction whereby in exchange for being labeled as gifted they accrue benefits to themselves such as a more prestigious education more income or residence in a more exclusive community The overarching aim of this book is to present conceptions of what identification and instruction of the gifted would look like if the focus of gifted education was transformational rather than transactional What if gifted education did not focus so much on acceleration vs enrichment or pull out versus in class integration but rather on how to be gifted in giving back in using one s gifts to create a better world
