Applications of AI in Smart Technologies and Manufacturing S.P. Jani, M. Adam Khan, 2025-10-14 Applications of AI in Smart Technologies and Manufacturing presents a rich repository of groundbreaking research in emerging engineering domains With contributions from eminent educators industrialists scientists and researchers this book highlights the transformative role of AI and smart technologies in enhancing community welfare and shaping the future of manufacturing and engineering practices This title comprises a selection of papers that reflect a global exchange of ideas in digital manufacturing advanced machining processes bioengineering tribology smart materials IoT applications energy storage smart cities robotics and AI applications in healthcare With special emphasis on optimization algorithms virtual and augmented reality in automation and smart energy technologies this volume delves into ways in which rapid technological advancements are breaking traditional barriers in education research and industrial applications This is a resourceful guide for researchers academicians engineers industrial practitioners and graduate students in the domains of mechanical engineering smart technologies artificial intelligence and automation It is also highly relevant to decision makers and R D professionals focused on applying AI and smart solutions to achieve sustainable innovation in engineering and technology

Dynamics of Vehicle-Road Coupled System Shaopu Yang, Liqun Chen, Shaohua Li, 2015-04-29 Vehicle dynamics and road dynamics are usually considered to be two largely independent subjects In vehicle dynamics road surface roughness is generally regarded as random excitation of the vehicle while in road dynamics the vehicle is generally regarded as a moving load acting on the pavement This book suggests a new research concept to integrate the vehicle and the road system with the help of a tire model and establishes a cross subject research framework dubbed vehicle pavement coupled system dynamics In this context the dynamics of the vehicle road and the vehicle road coupled system are investigated by means of theoretical analysis numerical simulations and field tests This book will be a valuable resource for university professors graduate students and engineers majoring in automotive design mechanical engineering highway engineering and other related areas Shaopu Yang is a professor and deputy president of Shijiazhuang Tiedao University China Liqun Chen is a professor at Shanghai University Shanghai China Shaohua Li is a professor at Shijiazhuang Tiedao University China
