International Conference on Sustainable Collaboration in Business, Technology, Information, and Innovation

(SCBTII 2023) Suhal Kusairi, Forget Mingiri Kapingura, Ratih Hendayani, Nizam Ahmat, 2023-11-17 This is an open access book Sustainable Collaboration in Business Technology Information and Innovation SCBTII 2023 Preserving the Sustainability of Business in Accelerated Digital Transformation and Transition Collide The COVID 19 pandemic had dealt a devastating blow to the SDGs which were already off track before the pandemic forced the closure of schools government services and workplaces worldwide The pandemic erased more than four years of progress in eradicating poverty and pushing millions into extreme poverty On the other hand digital transformation rapidly creates a world of ever faster technological developments In response every business must think of itself as a tech business Companies need to re design their processes and ensure their people have the skills needed for a world where we increasingly collaborate and work alongside capable and intelligent machines Unfortunately the war in Ukraine has accelerated the schism and confrontation between the major global powers Another point of tension is the US China relations joining the trade technological economic and geostrategic competition This year will be more significant But the world business before us is not divided into two concrete blocks Instead a full scale reconfiguration of alliances is underway which forces all other actors to reposition themselves about the new strategic competition dynamics and to seek out their own spaces in a global transformation On the other hand the green and the digital transitions which seemed to work hand in hand towards building a more sustainable world have collided

Against this backdrop universities as academic institutions play an essential role in educating and providing professional human resources and conducting high quality research that benefits humanity However universities must take a more significant part and be innovative and creative in engaging and supporting the development opportunities and consolidation of the Global community To embark on this role effectively universities must always foster communication and discussion among academicians scholars practitioners and policymakers under the Sustainability Development Goals SDGs Academia Government Business and Communities must increasingly cooperate to achieve academic and research excellence and constructive solutions to current business and economic issues Sustainable Collaboration in Business Information and Innovation SCBTII 2023 is an international conference that brings together academics professionals entrepreneurs researchers learners and other associated groups from all over the world that is interested in theories as well as practices in the field of the digital economy for global competitiveness This conference provides opportunities for presenters and participants to exchange new ideas and experiences create research relationships and find international partners for future collaboration to respond to economy business social and technological development challenges successfully and effectively for better life well being

The Space Value of Money Armen V. Papazian, 2022-09-03 The Space Value of Money introduces a fresh and innovative perspective on sustainability and finance. It expands our financial value framework heretofore built around risk and time by factoring in space as an analytical dimension and our physical context. The proposed principle and metrics entrench our responsibility for space impact into our value equations, making finance inherently sustainable and acting as a theoretical bridge between core finance theory and the growing field of sustainable finance or ESG integration. The book offers a novel approach to value design, measurement and creation, discussing the theoretical, mathematical, institutional, technological and data elements of the transformation. The Space Value of Money principle and metrics offer us the opportunity to adjust our financial value framework and transform human productivity in line with our sustainability targets. They also enable the design and engineering of the financial instruments that can help us address our evolutionary challenges, investment like the transition to Net Zero. Every once in a while a book comes along that makes a fundamental contribution that is both profound and practical. A book that every member of the National Space Council including the NASA Administrator and the Space Force chief of space operations should read. The Space Value of Money will be of interest to ESG and impact investors, government regulators, financial theorists and outer space enthusiasts. Lt Col Peter Garretson, Senior Fellow in Defense Studies at the American Foreign Policy Council. No doubt the pressing environmental challenges we face make the concept of the space impact of investments even more compelling. Dr Pascal Blanqu, Chairman of Amundi Institute, Former Group CIO of Amundi Asset Management. The Space Value of Money brings much needed conceptual rigour whilst further advocating the case for a new paradigm shift in financial valuation. This work gives us the lasting frameworks that aggregate impact across all spatial dimensions. Dr Papazian culminates over ten years of research in this rich book, providing the springboard for further innovation and system implementation in this area. Domenico Del Re, Director Sustainability and Climate Change, PwC. Enthralling and captivating. Papazian offers a clear, thorough and comprehensive discussion. The Space Value of Money gives us an opportunity to reframe our thinking and to explore what is possible. A great read. Daud Vicary, Founding Trustee of the Responsible Finance and Investment Foundation. Armen has developed a novel way to create financial models that are better suited to dealing with the many parameters required if we are to properly consider environmental factors and sustainability in economics and finance. I have found this engaging and look forward to seeing its future use. Dr Keith Carne, First Bursar, King's College, Cambridge University.
