Corporate Risk Management for International Business Ayse Kucuk Yilmaz, Triant Flouris, 2017-05-18 This book presents research on how businesses can be empowered to manage their company's risk exposure in international settings. It elaborates on approaches that advocate the minimizing of threats and sizing opportunities as the best strategy through which corporate objectives are maximized. With a focus on international business management, the book starts off with a review of literature and companies that are international in nature before presenting several main chapters that highlight the different vital sides of both international business and risk management. Multinational Enterprises and the Law Peter Muchlinski, 2021-02-18 Multinational Enterprises and the Law is the only comprehensive contemporary and interdisciplinary account of the techniques used to regulate multinational enterprises (MNEs) at the national, regional, and multilateral levels. In addition, it considers the effects of corporate self-regulation and the impact of civil society and community groups upon the development of the legal order in this area. The book has been thoroughly revised and updated for this third edition, making it a definitive reference work for students, researchers, and practitioners of international economic law, business, corporate, and commercial law, development studies, and international politics. Split into four parts, the book first deals with the conceptual basis for MNE regulation. It explains the growth of MNEs, their business and legal forms, and the relationship between them and the effects of a globalized economy and society now increasingly challenged by recently revived nationalist economic policies upon the evolution of regulatory agendas in the field. In addition, the limits of national and regional jurisdiction over MNE activities are considered a question that arises throughout the specialized areas of regulation covered in the remainder of the book. Part II covers the main areas of economic regulation, including controls over and the liberalization of entry and establishment, tax, company, and competition law, and the impact of intellectual property rights on technology diffusion and transfer. A specialized chapter on the regulation of multinational banks in the wake of the global financial crisis is new to this edition. Part III introduces the social dimension of MNE regulation, covering labour rights, human rights, and environmental issues. Finally, Part IV deals with the contribution of international investment law to MNE regulation and to the control of investment risks, covering the main provisions found in international investment agreements, their interpretation by international tribunals, the process of investor-state arbitration, and how concerns over these developments are leading to reform proposals.
