Overcoming Masculine Depression John Lynch, John R. Lynch, Christopher Kilmartin, 2013-08-21 In *Overcoming Masculine Depression* psychologists John Lynch and Christopher Kilmartin present a model that provides new

ways of understanding men's behaviors. This unique book does not portray men as victims but seeks to increase awareness that a great deal of depression in men is misunderstood and quite often misdiagnosed. Many men act out their symptoms through anger, workaholicism, and relationship conflict. Underlying these behaviors are chronic feelings of being hopeless, helpless, and worthless. Men can learn to recognize symptoms of masculine depression and take steps to reclaim their lives and relationships, and the authors offer many strategies for doing so. Numerous case examples are provided to illustrate the various dynamics of male depression. New to this edition are chapters on self-regulation and impulse control and the application of evidence-based treatment for depression to the symptoms of male depression. This is an essential resource for all helping professionals who work with male clients as well as for men experiencing symptoms of depression and the people in their lives.

Not Born Yesterday Hugo Mercier, 2022-03-22 Why people are not as gullible as we think. *Not Born Yesterday* explains how we decide who we can trust and what we should believe and argues that we're pretty good at making these decisions. In this lively and provocative book, Hugo Mercier demonstrates how virtually all attempts at mass persuasion, whether by religious leaders, politicians, or advertisers, fail miserably. Drawing on recent findings from political science and other fields ranging from history to anthropology, Mercier shows that the narrative of widespread gullibility, in which a credulous public is easily misled by demagogues and charlatans, is simply wrong. Why is mass persuasion so difficult? Mercier uses the latest findings from experimental psychology to show how each of us is endowed with sophisticated cognitive mechanisms of open vigilance. Computing a variety of cues, these mechanisms enable us to be on guard against harmful beliefs while being open enough to change our minds when presented with the right evidence. Even failures when we accept false confessions, spread wild rumors, or fall for quack medicine are better explained as bugs in otherwise well-functioning cognitive mechanisms than as symptoms of general gullibility. *Not Born Yesterday* shows how we filter the flow of information that surrounds us, argues that we do it well, and explains how we can do it better still.

Leadership James H. Dulebohn, Brian Murray, Dianna L. Stone, 2022-01-01 As we enter the third decade of the twenty-first century, we are seeing a renaissance of context in influencing leadership, leader-follower relations, and leader effectiveness, as well as a recognition of the tripartite nature of leadership. To fully understand and appreciate leadership, one must see the multiple parts of it, as well as the connections among them. Leadership is multi-dimensional; leadership depends on leaders, followers, and context. Leadership research in the past three decades has been dominated by interest in neo-charismatic leadership styles and a focus on leader-member exchange in leader-follower relationships. Recently, other approaches to leadership, such as ethical and authentic leaders, have garnered greater attention in response to the moral and ethical challenges in the workplace. Additionally, established approaches to leadership emergence and development have been challenged by their relevance to diverse work forces and issues of inclusion. This twelve-article volume includes an outstanding roster of established and emerging leadership authors who tackle questions of leadership at the intersections of leaders, followers, and context. The

volume opens with two articles that set the stage for the current state of leadership research and paths for its future including a commentary by Edwin Locke and Gary Latham on current management research practices and an action oriented review of leadership research from the start of the 21st century The volume is organized around three themes leadership and diversity leader follower relationships and systems of leader follower and context Articles in the volume advance diversity research with an integration of leadership and diversity theories that demonstrate the former s need for re examination in light of the latter a systematic development of inclusive leadership theory and a close examination of immigrant ethnic identity The authors of several articles expand our understanding of leader follower relationships in the context of teams and alliances the contextual boundaries of authentic leadership theory and the authentic leader s potential impact on harassment in organizations The volume culminates with three demonstrations of leadership as systems of leader follower context interaction including a close examination of the toxic triangle s manifestation in university scandals a micro process model of power and leadership and a configurational approach to studying leadership The volume is designed primarily for scholars in the fields of human resource management organizational behavior and leadership It also well serves the needs of instructors and students in master s and doctoral courses in leadership or organizational behavior Each article is grounded in managerial context that will appeal to practitioners in the field
