What Causes Human Behavior Stephen F. Ledoux, 2017-09-27 What experts are saying about What Causes Human Behavior Stephen Ledoux's book is a strong non-compromising theoretical and philosophical argument that the answers come from behaviorology the natural science of behavior that the answers do not come from astrology theology etc or from psychology the mentalistic unnatural science of the mind And he supports his argument with examples of effective science based applications of applied behaviorology applied behavior analysis and with analyses of human behavior in everyday life going from simple behaviors to complex verbal behavior with suggestions that behaviorology is crucial to the solutions of the world problems of overpopulation sustainability and global warming But also he's not afraid to make these complex topics more readable by using an occasional contraction an informed expression and even a little humor i.e. he's way cool Richard Malott Ph.D. Professor Western Michigan University Professor Ledoux has written a primer on a newly emerging discipline behaviorology It is the natural science of environment behavior relations and an intellectually challenging subject one that variously intersects with astrology psychology philosophy education and physiology plus other biological and behavioral sciences Ledoux's discussion of explanatory fictions and a variety of other explanatory fallacies alone however is worth the price of admission And there is so much more John Stone Ph.D. Professor East Tennessee State University Johnson City and President Education Consumers Foundation at www.educationconsumers.org

Learning and Complex Behavior Donahoe, *Behavior Modification* Robert J. Presbie, 1980 **Behaviorology** Eddie Rafii, 2020-07-22 WE DO NOT MOVE UNLESS WE ARE BOTHERED The most brilliant discovery of human nature every single human motion relates to a bothersome We remain immobile if nothing bothers us Imagine sitting on the sofa in your living room completely comfortable with nothing at all to bother you You are not hungry thirsty or tired You are not cold hot or sick The telephone doesn't ring You are not worried about bills coming due or your job or business You don't have to do laundry or any other chores You are not bored or sleepy You are not curious about anything and absolutely nothing makes you uncomfortable worried excited or upset You are simply and continuously calm and comfortable sitting on that sofa Do you make any movement WHAT HAPPENS IN OUR MINDS WHEN WE INITIATE MOTIONS We perform motions based on the potential outcomes of our joy and suffering There is constant evaluation of joy and suffering in our brains and we perform motions where there is more enjoyment and less suffering In other words the outcomes of our wants and fears determine our

motions WHAT WOULD BE THE FIRST MOTION OF OUR BODIES IF NOTHING BOTHERED US Our actions depend on our balance We perform motions only when we lose our balance and we remain immobile when we are in balance that s how our system works When you see a beggar you lose your balance comfort and you give him or her a dollar to regain your balance Someone gives you a flower and you say thank you to regain you balance How would you feel if you didn t say thank you when someone gave you a flower Obviously you would feel uncomfortable and imbalanced PROBLEMS CREATE IMBALANCE AND WANTS IN US WE PERFORM MOTIONS TO REGAIN OUR BALANCE SUFFERING AND JOY ARE ASSOCIATED WITH EACH MOTION AND THAT S HOW LIFE BEGINS AND CONTINUES Further experiment proves Actions and reactions are chemical not psychological Feelings constitute a certain chemical process in the brain and there is nothing beyond our bodies such as emotions Depression anxiety mania and other so called mental disorders are the result of chemical imbalance so what does that say about human nature Behaviology a revolutionary new branch of science analyzing human behavior suggests that the potential outcome of our wants and fears determines our motions Rafii lays out seven facts about human motions We always want to be comfortable balanced We move only when we lose our balance Loss of balance always creates want in us Every motion is associated with suffering and joy More suffering leads to more joy The outcome of want and fear determines motion Personality physicality and mental and environmental conditions determine desires and fears and we move based on the sum of the outcomes of those desires and fears **Behavior Modification** Edward P.
