1 What To Watch Out For This Month Securing The Human:

Securing Human Rights? Bardo Fassbender, 2011 Throughout the first decades of its existence many held the view that the UN Security Council would in some senses automatically encourage the protection of human rights by maintaining international peace However since the end of the Cold War there have been growing concerns that the Council is a force with the potential to do harm to the cause of human rights even to the extent of violating the rights of individuals The chapters of this volume take a closer look at these two sides of the Security Council's involvement in human rights both its efforts to promote and enforce human rights and its actions that with the intention of maintaining and restoring international peace also have the potential to jeopardize human rights This book represents a collection of individual views and appraisals of how the Council has dealt with human rights issues in the post Cold War period particularly in the cases of the economic sanctions imposed on Iraq and the targeted sanctions directed against the Taliban and supporters of the Al Qaida network Written by experts in the field of international law they are both positive and negative critical and analytical Together they offer a selection of different perspectives and evaluate the contribution of the Security Council to the promotion of human rights highlighting possible avenue for improvement Research Handbook on Feminist Engagement with International Law Susan Harris Rimmer, Kate Ogg, For almost 30 years scholars and advocates have been exploring the interaction and potential between the rights and well being of women and the promise of international law This collection posits that the next frontier for international law is increasing its relevance beneficence and impact for women in the developing world and to deal with a much wider range of issues through a feminist lens *Global Pandemic, Security and Human Rights* Ben Stanford, Steve Foster, Carlos Espaliu Berdud, 2021-12-29 This book presents an international and comparative exploration of how the COVID 19 global pandemic has affected and impacted on issues of human rights security and law Throughout the world the COVID 19 global pandemic has fundamentally impacted and altered our way of life As this book sets out all states have had to contend with similar challenges as well as competing interests and obligations affecting human rights and security These challenges present very few simple choices but nonetheless carry enormous consequences Organised into two thematic and distinct yet interrelated parts first on theoretical and practical challenges for human rights and second on threats to personal collective and global security the book examines how the ability of states to safeguard our fundamental rights and security broadly defined has been challenged Questions about the legality and legal impact of recent responses to COVID 19 will persist for some time It is often said that global problems require coordinated global solutions but the various responses to the pandemic by states suggest a notable lack of a consensus amongst the international community The book will be of interest to academics and researchers working in the areas of human rights law and security law It will also appeal to constitutional lawyers given the nature of law making and the challenge of ensuring adequate scrutiny in emergency situations as well as the impact of COVID 19 upon the legal framework more generally It will provide a valuable resource for

policymakers practitioners and public servants **Effective Strategies for Protecting Human Rights** David Barnhizer, 2017-11-01 This title was first published in 2001 This book brings together the experiences of a diverse range of leading human rights advocates and activists to demonstrate strategies for protecting human rights The volume identifies strategic problems and approaches and offers a range of strategies that hold promise for sanctioning human rights offenders and for inhibiting the behaviour of those who might otherwise engage in such activities The contributors include inter alia Noam Chomsky Justice Richard Goldstone of the Constitutional Court of South Africa who served as Chief Prosecutor of the UN War Crimes Tribunals for the former Yugoslavia and Rwanda and David Rawson United States Ambassador to Rwanda during the tragic genocide Those who work in the disparate field of human rights increasingly understand the need to see the system strategically rather than piecemeal This volume captures their insights and looks at both private and public actors including the uses and limitations of international fora to prosecute violations The focus is expanded to include private actions because political issues too often interfere with enforcement of human rights laws allowing violators to hide behind the unwillingness of national governments to take action **Protecting Human Security in a Post 9/11 World** Giorgio Shani, Makoto Sato, 2007-11-09 Written by leading authorities from Asia Africa Europe and North and South America this groundbreaking volume offers the first truly global and critical perspective on human security in the post 9 11 world The collection offers unique interpretations on mainstream discourses on human security **The United Nations System for Protecting Human Rights** Dinah L. Shelton, 2016-12-05 The United Nations has been at the forefront of developing the international law of human rights for nearly seven decades This volume brings together the leading research articles on the development of human rights law by the United Nations and also includes essays on issues relating to standard setting institutional evolution and the creation of monitoring procedures **Protecting Human Rights in Occupied Palestine** Richard Falk, John Dugard, Michael Lynk, 2023-01-15 This book is the first comprehensive examination of UN efforts to protect Palestinian human rights in the territories occupied by Israel more than 50 years ago in the 1967 War Working through the UN Human Rights Council in Geneva three top international legal experts served for six consecutive years as unpaid Special Rapporteurs with a UN mandate to report on Israeli violations of international humanitarian law and human rights standards Being outside the discipline that controls UN bureaucrats they enjoyed a high measure of political independence in carrying out their factfinding and reporting missions Strikingly despite their differences in background and political outlook they came to a unanimous consensus confirming the routine and various Israeli violations of Palestinian basic rights This book recounts their frustrations their trials their experiences and their conclusions This joint effort breaks new ground in studies by the UN in several respects It demonstrates both the positive role played by the UN in a politically controversial area and its blockage by geopolitical forces preventing it from securing the implementation of international law However the intense reactions of Israel and pro Israeli NGOs to this UN work most notably by UN Watch attest to the significance of a reliable

accounting of Israeli violations of Palestinian human rights Their consistent evasion of the substantive charges made by careful reporting and recourse by Israeli supporters to discrediting defamatory attacks on the persons of these Special Rapporteurs with charges of anti-Semitism the core of which is subtly shifted from its proper usage as hatred of Jews to justifiable criticism of the state of Israel While some might argue that the UN inability to enforce international law as futile or worse view the UN as merely a vehicle of power politics this book proves that international public opinion and international solidarity politics are influenced by persuasive expert findings as to international law Such well evidenced conclusions encourage transnational activism as is evident from increased worldwide support for the BDS Campaign and other nonviolent external pressures This brilliant and authoritative account of the manner in which Israel has administered the Occupied Palestinian Territory during the past 20 years should be regarded as the definitive assessment of that situation **Human Security and the UN** S. Neil MacFarlane, Yuen Foong Khong, 2006-02-13 A hard headed analysis of the role of the UN in translating ideas about human security from theory into practice **Protecting Human Rights** Tom Campbell, Jeffrey Denys Goldsworthy, Adrienne Sarah Ackary Stone, 2003 Conceptual boundaries and functions of human rights **Serious Violations of Human Rights** Ilia Siatitsa, 2022 This monograph represents the most recent analysis of the use of the expression serious violations of human rights in international practice It proposes a systematic and structured engagement with the international practice around serious violations of human rights Stabilization and Human Security in UN Peace Operations Alexander Gilder, 2021-11-29 UN peace operations are increasingly asked to pursue stabilization mandates with lofty expectations of being able to stabilize conflict zones achieve national reconciliation and rebuild state legitimacy This book investigates the relationship between UN stabilization mandates and the concept of human security The book is divided into three parts Part I outlines the emergence of stabilization and other trends in peacekeeping practice and outlines an analytical framework of human security Part II applies the analytical framework to case studies of MINUSMA MINUSCA and UNMISS examining issues such as human rights empowerment protection and vulnerability In Part III the book draws out several concerns that arise from stabilization mandates including the militarisation of UN peace operations and the consequences under international humanitarian law the risks of close cooperation with the host state and engagement in counter terror activities and the potential clash between peacebuilding activities and militarisation The book will be a valuable resource for academics policymakers and practitioners working on UN peacekeeping generally and those specifically looking at stabilization from the perspective of international relations international law peace and conflict studies security studies and human rights Computer Science Protecting Human Society Against Epidemics Aleksander Byrski, Tadeusz Czachórski, Erol Gelenbe, Krzysztof Grochla, Yuko Murayama, 2021-09-01 This book constitutes the refereed post conference proceedings of the First IFIP TC 5 International Conference on Computer Science Protecting Human Society Against Epidemics ANTICOVID 2021 held virtually in June 2021 The 7 full and 4 short papers presented were carefully

reviewed and selected from 20 submissions The papers are concerned with a very large spectrum of problems ranging from linguistics for automatic translation of medical terms to a proposition for a worldwide system of fast reaction to emerging pandemic

Protecting Human Rights and Building Peace in Post-Violence Societies Nasia

Hadjigeorgiou,2020-02-20 This book critically examines the relationship between protecting human rights and building peace in post violence societies It explores the conditions that must be present and strategies that should be adopted for the former to contribute to the latter The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their grievance and by encouraging the state to respond to and provide them with a meaningful remedy This usually happens either through a process of adjudication whereby human rights can offer guidance to the judiciary as to the best way to address such grievances or through the passing and implementation of human rights laws and policies that seek to promote peace However this positive relationship between human rights and peace is both qualified and context specific Through an interdisciplinary and comparative analysis of four case studies the book identifies the conditions that can support the effective use of human rights as peacebuilding tools Developing these the book recommends a series of strategies that peacebuilders should adopt and rely on Winner of the Constantinos Emilianides Award in Law for 2020 joint conferment

Protecting Human Rights Defenders at Risk Alice M. Nah,2020-11-22 This book assesses the

construction operation and effects of the international protection regime for human rights defenders which has evolved significantly over the last twenty years in response to the risks people face as they promote and protect human rights Drawing upon the experiences of human rights defenders who continue to persevere in their activism in Indonesia Egypt Kenya Mexico and Colombia this edited collection examines the ways in which formal protection mechanisms by state and civil society actors intersect with self protection measures and informal protection initiatives by families and friends It highlights that protection practices are most effective when they are designed to address the specific risks that human rights defenders face which are gendered and intersectional reflect how defenders understand risk security and protection and are appropriate for the dynamic sociopolitical and legal contexts in which defenders operate This book proposes ways in which the protection of human rights defenders at risk should be reimaged and practised This book will be a thought provoking guide for students and scholars of politics international relations law and human rights as well as to practitioners engaged in the protection of human rights defenders at risk

Human Security in Disease and Disaster Natasha Lindstaedt,2021-09-19

This timely new textbook lays bare the ways in which disease and disaster can turn politicians into global leaders or national liabilities. It explains the impact of crises on development and human security and explores how states and societies can respond more effectively. Written primarily for the student of politics but also drawing from public health, public policy and environmental studies, the book investigates the threats posed by disease and disasters and demonstrates how states can shape the ways in which these crises unfold. Case studies include Diseases such as Covid 19 and Ebola. Natural disasters such as Typhoon Haiyan and the 2010 Haiti earthquake. Manmade disasters such as the Yemen and Congo civil wars or famine. The book delves deep into how state response to these challenges can impact political and economic stability and ends by exploring the role played by international institutions and international cooperation in addressing common challenges. This introductory textbook is perfect for undergraduate and masters courses exploring the expanding politics and human security issues surrounding disease and disasters. It will also be of interest to think tanks and policy communities looking for fresh insights to bring into professional practice.

Protecting Human Rights Todd Landman, 2005-10-04. Ours has been called a global age of rights, an era in which respect for human rights is considered the highest aspiration of the international democratic community. Since the United Nations 1948 Universal Declaration of Human Rights, a wide variety of protections, civil, political, economic, social and cultural, have been given legal validation as countries ratify treaties, participate in intergovernmental organizations and establish human rights tribunals and truth and reconciliation commissions. Yet notable human rights failures have marred the post Declaration era, including ongoing state violence toward citizens, the selectivity of humanitarian intervention, evidenced by the international community's failure to respond in Rwanda, and recent legislation in advanced democracies that trades some rights for protection against the threat of terrorism. How are we to reconcile the language of rights with the reality? Do we live in an age of rights after all? In *Protecting Human Rights*, Todd Landman provides a unique quantitative analysis of the marked gap between the principle and practice of human rights. Applying theories and methods from the fields of international law, international relations and comparative politics, Landman examines data from 193 countries over 25 years, 1976-2000, to assess the growth of the international human rights regime, the effect of law on actual protection and global variation in human rights norms. Landman contends that human rights foreign policy remains based more on geo-strategic interest than moral internationalism. He argues that the influence human rights ideals have begun to have on states cannot be separated from the broader impact of socioeconomic changes that swept the globe in the late twentieth century. Landman concludes that international law alone will not suffice to fully protect human rights; it must be accompanied by democratic government, effective conflict resolution and just economic systems.

Protecting Human Rights in the 21st Century Aidan Hehir, Robert W. Murray, 2017-04-12. This book contributes to current debates on the protection of human rights in the 21st century. With the global economic collapse, the rise of the BRICS, the post-intervention chaos in Libya, the migration crisis in Europe and the regional conflagration sparked by the conflict in Syria, the need to

protect human rights has arguably never been greater In light of the precipitous decline in global respect for human rights and the eruption or escalation of intra state crises across the world this book asks what is the future of human rights protection Seeking to avoid both denial and fatalism this book thus aims to examine the principles at the very foundation of the debate on human rights diagnose the causes of the decline of liberal internationalism so as to offer guiding lessons for future initiatives identify those practices and developments that can and should be preserved in the new era question the parameters of the contemporary debate and advance perspectives that aim to identify the contours of future ideas and practices that may offer a way forward This book will be of much interest to students of humanitarian intervention R2P international organisations human rights and security studies Protecting Human Rights in the EU Tanel

Kerikmäe, 2013-08-30 Human rights are much talked about and much written about in academic legal literature as well as in political and other social sciences and the general political debate This book argues that the universality of basic human rights is one of the values of the concept of rights It points out the risk of a certain inflation caused by the current habit of talking so much and so often about human rights and of using them as a basis for claims of various kinds These rights their understanding and interpretation may need to become more purist to ensure that universal human rights as a concept survive Another chapter concentrates on the analysis of the frames of EU protected human rights from the perspective of effective implementation Further the book not only deals with the complicated relations between the EU and international law but also seeks to show the horizontal effect To that end the fears and hopes of the member states and interest groups are categorized and commented on Lastly the gaps in theory and practice are addressed current trends related to implementation are pointed out and suggestions are made concerning how to make the best out of the Charter
