Trading the Hard Right Edge G. Picciuli, Trading is challenging for most people because they simply don't have information tools or confidence to become successful and trading the hard right edge can be downright scary without it Trading the Hard Right Edge is important for especially for beginners because it tells it like it is and gives an inside look at trading the financial markets giving you the reality on what the live market is really like the way they are really run and also tells you who runs them and what you need to do as a self directed trader to survive in them Let's face it it's a well known fact that 97% of self directed investors and traders fail and lose all of their money why does this happen It happens because brand new self directed traders enter into this business with a bunch of misguided grandiose ideas of making a million dollars from trading and while you can surely make millions of dollars from trading however you would need to be using hundreds of millions of dollars of capital to do so no joke As a brand new self directed trader you have no idea of the brutality and volatility that goes on in the live markets on a daily basis and that there are people in the live markets like the smart money who will walk over dead bodies to get paid so make no mistake as a retail trader and think you can go in the live market and beat them you can't What you can do though is properly prepare yourself to trade with the best traders in the world and get paid right along with them instead of paying them Once you have completed reading Trading the Hard Right Edge you will have a chance at competing with the best professional traders on the planet The techniques in Trading the Hard Right Edge will put you on the fast track to being able to make an unlimited income for yourself and becoming consistently profitable enough from trading the financial markets to perhaps even making a living from doing it isn't that the reason you're doing it
