knows at least one language spoken or signed Linguistics is the science of language including the sounds words and  
grammar rules Words in languages are finite but sentences are not It is this creative aspect of human language that sets it  
apart from animal languages which are essentially responses to stimuli The rules of a language also called grammar are  
learned as one acquires a language These rules include phonology the sound system morphology the structure of words  
syntax the combination of words into sentences semantics the ways in which sounds and meanings are related and the  
lexicon or mental dictionary of words When you know a language you know words in that language However the sounds and  
meanings of words are arbitrary For the most part there is no relationship between the way a word is pronounced and its  
meaning      **Newsweek** ,2007      **Copy Editor** ,2007      **Quill & Quire** ,2006
