172 Hours On The Moon:

172 Hours on the Moon Johan Harstad, 2012-04-17 A terrifying thriller for young adult fans of *The Martian* and paranormal space adventure that will be devoured in one heart pounding sitting. It's been decades since anyone set foot on the moon. Now three ordinary teenagers, the winners of NASA's unprecedented worldwide lottery, are about to become the first young people in space and change their lives forever. It's the opportunity of a lifetime, but little do the teenagers know that something sinister is waiting for them on the desolate surface of the moon. And in the black vacuum of space, no one is coming to save them. In this chilling adventure set in the most brutal landscape known to man, highly acclaimed Norwegian novelist Johan Harstad creates a vivid and frightening world of possibilities we can only hope never come true. *172 Hours on the Moon* Johan Harstad, 2012. In 2019, teens Mia Antoine and Midori are selected by lottery to join experienced astronauts on a NASA mission to the once top secret moon base DARLAH 2, while in a Florida nursing home, a former astronaut struggles to warn someone of the terrible danger there. Exploring Text, Media, and Memory Patrizia Lombardo, Lars Sætre, Sara Tanderup Linkis, 2018-12-31. *Exploring Text, Media, and Memory* investigates the link between memory and media by asking a series of questions pertinent to our time: How do individual and collective memories blend? How do traumatic experiences from past events and catastrophic projections of the future reveal the human condition in the epoch of frenetic technological reproduction of works of art? How is the human body tied to narrations and why? A group of international scholars tackle questions like these across art forms, media, and cultural history. In nineteen essays, they argue that modern and contemporary literary texts and visual arts show how photography, film, tape recording, television, and internet are not just means of storing memory and information but objects that we interact with every day, challenging static visions of places and the linear notions of past, present, and future. *172 Hours on the Moon* Harstad Johan Chace Tara, 2014-06-06. In 2019, teens Mia Antoine and Midori are selected by lottery to join experienced astronauts on a NASA mission to the once top secret moon base DARLAH 2, while in a Florida nursing home, a former astronaut struggles to warn someone of the terrible danger there.

The Politics of Dementia Irmela Marei Krüger-Fürhoff, Nina Schmidt, Sue Vice, 2021-11-22. Memory loss is not always viewed purely as a contingent neurobiological process present in an ageing population; rather, it is frequently related to larger societal issues and political debates. This edited volume examines how different media and genres—novels, autobiographical writings, documentary, as well as fictional films and graphic memoirs—represent dementia for the sake of critical explorations of memory, trauma, and contested truths. In ten analytical chapters and one piece of graphic art, the contributors examine the ways in which what might seem to be the individual, ahistorical diseases of dementia are used in contemporary cultural texts to represent and respond to violent historical and political events ranging from the Holocaust to postcolonial conditions, all of which can prove difficult to remember. Combining approaches from literary studies with insights from memory studies, trauma studies, anthropology, the critical medical humanities, and media, film, and comics studies, this volume explores the

politics of dementia and incites new debates on cultures of remembrance while remaining attentive to the lived reality of dementia
