The Cold War: Origins and Developments United States. Congress. House. Foreign Affairs, 1971 *World History: Connections to Today* Elisabeth Gaynor Ellis, Pearson/Prentice Hall, 2003-12 **Confucianism, Colonialism, and the Cold War** Grace Ai-Ling Chou, 2011-10-14 By tracing the history of Hong Kong's New Asia College from its 1949 establishment through its 1963 incorporation into The Chinese University of Hong Kong this study examines the interaction of colonial communist and cultural forces on the Chinese periphery **The American bomb in Britain** Ken Young, 2016-07-22 This study tells the story of the strategic nuclear forces deployed to England by the United States from the late 1940s and details the secret agreement made to launch atomic strikes against the USSR Drawing on more than a decade's research in archives on both sides of the Atlantic hitherto unknown aspects of Cold War history are revealed The book deals with the United States Air Force's USAF relations with their British hosts as well as tensions between the American commands with the continuous struggle to develop and safeguard the expanding base network and with the losing battle to provide the deployed bomber forces with an adequate air defence This challenging analysis based on massive archival sources will provoke and stimulate Cold War historians and air power enthusiasts alike and be read by those many veterans who served in the units of Strategic Air Command and the USAF in Europe during that brief but dangerous period of nuclear history **Graduate Studies**, 1991 *Scholastic Update*, 1984 **Bulletin of the Atomic Scientists**, 1955-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *The Bloomsbury Handbook to Cold War Literary Cultures* Greg Barnhisel, 2022-06-30 Adopting a unique historical approach to its subject and with a particular focus on the institutions involved in the creation dissemination and reception of literature this handbook surveys the way in which the Cold War shaped literature and literary production and how literature affected the course of the Cold War To do so in addition to more traditional sources it uses institutions like MFA programs university literature departments book review sections of newspapers publishing houses non governmental cultural agencies libraries and literary magazines as a way to understand works of the period differently Broad in both their geographical range and the range of writers they cover the book's essays examine works of mainstream American literary fiction from writers such as Roth Updike and Faulkner as well as moving beyond the U S and the U K to detail how writers and readers from countries including but not limited to Taiwan Japan Uganda South Africa India Cuba the USSR and the Czech Republic engaged with and contributed to Anglo American literary texts and institutions **The Origins of Surface-to-Air Guided Missile Technology** James Mills, 2024-01-05 Author James Mills presents an amazing detailed history review of the German surface to air guided missile technology development Military Review World War II saw the appearance of numerous revolutionary armaments on both sides of the conflict that would radically change the nature of warfare from jet aircraft to the ballistic

missile and the atomic bomb The greatest conflagration in history also saw the conception of the first surface to air guided missile systems technology pioneered by German scientists and engineers through an extensive development program which ran from 1942 to 1945 Although the program did not achieve its main objective to introduce a functional weapon system into the Luftwaffe air defense network German research and development in most aspects of the technology was ahead of comparable research in the United Kingdom and the United States The history of the transfer of German SAM technology to the Allies after 1945 has previously been overshadowed by the well published transfers of the V 1 and V 2 guided missiles This book presents the first complete history of Germany's wartime development of surface to air missile SAM technology how the Allies acquired this secret research towards the end of World War II in Europe and in the early postwar period and how they then exploited this knowledge

A History of Islam in America Kambiz GhaneaBassiri, 2010-04-19 Muslims began arriving in the New World long before the rise of the Atlantic slave trade Kambiz GhaneaBassiri's fascinating book traces the history of Muslims in the United States and their different waves of immigration and conversion across five centuries through colonial and antebellum America through world wars and civil rights struggles to the contemporary era The book tells the often deeply moving stories of individual Muslims and their lives as immigrants and citizens within the broad context of the American religious experience showing how that experience has been integral to the evolution of American Muslim institutions and practices This is a unique and intelligent portrayal of a diverse religious community and its relationship with America It will serve as a strong antidote to the current politicized dichotomy between Islam and the West which has come to dominate the study of Muslims in America and further afield

Human Emotions and the Origins of Bioethics Susi Ferrarello, 2020-12-06 This book provides a unique phenomenological dialogue between psychology and philosophy on the origin of bioethics that shows the importance of bringing emotions into bioethical discourse Divided into two parts the book begins by defining bioethics and explaining the importance of emotions in making us human allowing us to consider life holistically Ferrarello argues that emotions and bioethics are better served when they are combined and that dismissing emotions as nothing more than a nuisance to our rationality has created a society that does not fit our human nature Chapters explore how ethics relate to intimate life and how ethical agents determine themselves within their surrounding world uniquely and interrogatively using bioethics to consider not only medical dilemmas but also issues concerning environmental and individual well being By addressing personal interpersonal and societal problems as dynamically interconnected in bioethical problems she helps us to renew our sense of responsibility toward a good quality of life This interdisciplinary book is invaluable reading for students of health science psychology and philosophy as well as for those interested in the link between emotions and bioethical discourse from both a psychological and philosophical perspective
