Nuclear Science Abstracts ,1975 *Hearings* United States. Congress. House. Committee on Science and Astronautics,1964 **Integral Geometry and Tomography** Andrew Markoe,2006 This volume consists of a collection of papers that brings together fundamental research in Radon transforms integral geometry and tomography It grew out of the Special Session at a Sectional Meeting of the American Mathematical Society in 2004 The book contains very recent work of some of the top researchers in the field The articles in the book deal with the determination of properties of functions on a manifold by integral theoretic methods or by determining the geometric structure of subsets of a manifold by analytic methods Of particular concern are ways of reconstructing an unknown function from some of its projections Radon transforms were developed at the beginning of the twentieth century by researchers who were motivated by problems in differential geometry mathematical physics and partial differential equations Later medical applications of these transforms produced breakthroughs in imaging technology that resulted in the 1979 Nobel Prize in Physiology and Medicine for the development of computerized tomography Today the subject boasts substantial cross disciplinary interactions both in pure and applied mathematics as well as medicine engineering biology physics geosciences and industrial testing Therefore this volume should be of interest to a wide spectrum of researchers both in mathematics and in other fields **American Journal of Physics** ,1989 **Notices of the American Mathematical Society** American Mathematical Society,1978 Contains articles of significant interest to mathematicians including reports on current mathematical research

Biomembrane Frontiers Thomas Jue,Subhash H. Risbud,Marjorie L.
