1. General description

The HITAG product line is well known and established in the contactless identification market.

Due to the open marketing strategy of NXP Semiconductors there are various manufacturers well established for both the transponders/cards as well as the read/write devices. All of them supporting HITAG 1, HITAG 2 and HITAG S transponder ICs.

With the new HITAG μ family, this existing infrastructure is extended with the next generation of ICs being substantially smaller in mechanical size, lower in cost, offering more operation distance and speed, but still being operated with the same reader infrastructure and transponder manufacturing equipment.

The protocol and command structure for HITAG μ is design to support Reader Talks First (RTF) operation, including anti-collision algorithm.

Different memory sizes are offered and can be operated using exactly the same protocol.

1.1 Target markets

1.1.1 Animal identification

The ISO standards ISO 11784 and ISO 11785 are well established in this market and HITAG μ is especially designed to deliver the optimum performance compliant to these standards. The HITAG μ advanced ICs are offering additional memory for storage of customized offline data like further breeding details.

1.1.2 Laundry automation

- Identify 200 pcs of garment with one read/write device
- Long operation distance with typical small shaped laundry button transponders
- Insensitive to harsh conditions like pressure, heat and water

Srivastava, 2002-07-08 Get up to speed on the latest methods of multivariate statistics Multivariate statistical methods provide a powerful tool for analyzing data when observations are taken over a period of time on the same subject With the advent of fast and efficient computers and the availability of computer packages such as S plus and SAS multivariate methods once too complex to tackle are now within reach of most researchers and data analysts With an emphasis on computing techniques in combination with a full understanding of the mathematics behind the methods *Methods of Multivariate Statistics* offers an up to date account of multivariate methods Focusing on the maximum likelihood method for estimation testing of hypotheses and profile analysis this book offers comprehensive discussions of commonly encountered multivariate data and also covers some practical and important problems lacking in other texts These include Missing at random observations Growth Curve Models and multivariate one sided tests applicable in pharmaceutical and medical trials Bootstrap methods Principal component method for predicting a multivariate response vector Outlier detection and handling inference when covariance is singular With clear chapter introductions and numerous problem sets *Methods of Multivariate Statistics* meets every statistician's need for a comprehensive investigation of the latest methods in multivariate statistics **Statistical Process Control For Quality Improvement- Hardcover Version** J. Koronacki, J.R. Thompson, 2001-12-26 The first edition of this groundbreaking text showed that the Statistical Process Control SPC paradigm of W Edwards Deming was not at all the same as the Quality Control paradigm that has dominated American manufacturing since World War II Its philosophy of good management is rooted in a paradigm as process oriented as physics yet produces a friendly and fulfilling work environment This second edition broadens its view to reveal even more of Deming's philosophy and provides more techniques for use at the managerial level It shows readers that CEOs and service industries need SPC at least as much as production lines and it offers precise methods and guidelines for their use *Commercial and Government Radio Stations of the U.S.* United States. Control of Nonlinear Differential Algebraic Equation Systems with Applications to Chemical Processes Aditya Kumar, 2020-12-22 The feedback control of nonlinear differential and algebraic equation systems DAEs is a relatively new subject Developing steadily over the last few years it has generated growing interest inspired by its engineering applications and by advances in the feedback control of nonlinear ordinary differential equations ODEs This book the first of its kind introduces the reader to the inherent characteristics of nonlinear DAE systems and the methods used to address their control then discusses the significance of DAE systems to the modeling and control of chemical processes Within a unified framework Control of Nonlinear Differential Algebraic Equation Systems presents recent results on the stabilization output tracking and disturbance elimination for a large class of nonlinear DAE systems Written at a basic mathematical level assuming some familiarity with analysis and control of nonlinear ODEs the authors focus on continuous time systems of differential and

algebraic equations in semi explicit form Beginning with background material about DAE systems and their differences from ODE systems the book discusses generic classes of chemical processes feedback control of regular and non regular DAE systems control of systems with disturbance inputs the connection of the DAE systems considered with singularly perturbed systems and finally offers examples that illustrate the application of control methods and the advantages of using high index DAE models as the basis for controller design Mathematicians and engineers will find that this book provides unique timely results that also clearly documents the relevance of DAE systems to chemical processes [ARM Assembly Language](#)
