Building Systems Integration for Enhanced Environmental Performance Shahin Vassigh, Jason R. Chandler, 2011 Looks at the issues of sustainability and environmental impact in the field of building design and architecture This book addresses sustainability in building design through development of a series of examples presented as three dimensional models of well integrated building systems

Tall Buildings Mehmet Günel, Hüseyin İlgin, 2014-06-27 The structural challenges of building 800 metres into the sky are substantial and include several factors which do not affect low rise construction This book focusses on these areas specifically to provide the architectural and structural knowledge which must be taken into account in order to design tall buildings successfully In presenting examples of steel reinforced concrete and composite structural systems for such buildings it is shown that wind load has a very important effect on the architectural and structural design The aerodynamic approach to tall buildings is considered in this context as is earthquake induced lateral loading Case studies of some of the world's most iconic buildings illustrated with full colour photographs structural plans and axonometrics will bring to life the design challenges which they presented to architects and structural engineers The Empire State Building the Burj Khalifa Taipei 101 and the HSB Turning Torso are just a few examples of the buildings whose real life specifications are used to explain and illustrate core design principles and their subsequent effect on the finished structure

Architect: The evolving story of a profession Eleanor Jolliffe, Paul Crosby, 2023-06-01 The architect's role is constantly adapting Throughout history it has shifted significantly shaped by social cultural technological and economic forces The very definition of what an architect is and does has evolved over time from lead builder or master mason to principal designer A collaborative and reactive profession it is inextricably linked to the power of the patron whether the client is an influential and affluent individual or a political commercial civic or religious organisation From Ancient Egypt where architects were members of the ruling class tied into the running of the empire to the 21st century when questions are being raised about the future of the profession this book with its engaging narrative explores the constant threads that remain as the profession adapts While architects are no longer deified their ability to imagine a new impending reality in built form implies a visionary dimension to their work By focusing on both the practicalities of the profession and the more intangible motivations behind design humans need to make a mark upon their surroundings this volume provides a critical overview of over 3000 years of practice and education Looking at the key questions of where the architectural profession originated in the Western tradition why it is how it is today and where it might be going next the authors postulate that architects ability to adapt and reinvent themselves in the past will stand them in good stead for the uncertainties of the future

Designing for Zero Waste Steffen Lehmann, Robert Crocker, 2013-07-03 Designing for Zero Waste is a timely topical and necessary publication Materials and resources are being depleted at an accelerating speed and rising consumption trends across the globe have placed material efficiency waste reduction and recycling at the centre of many government policy agendas giving them an unprecedented

urgency While there has been a considerable literature addressing consumption and waste reduction from different disciplinary perspectives the complex nature of the problem requires an increasing degree of interdisciplinarity Resource recovery and the optimisation of material flow can only be achieved alongside and through behaviour change to reduce the creation of material waste and wasteful consumption This book aims to develop a more robust understanding of the links between lifestyle consumption technologies and urban development

Restorative Cities Jenny Roe,Layla

McCay,2021-07-15 Overcrowding noise and air pollution long commutes and lack of daylight can take a huge toll on the mental well being of city dwellers With mental healthcare services under increasing pressure could a better approach to urban design and planning provide a solution The restrictions faced by city residents around the world during the COVID 19 pandemic has brought home just how much urban design can affect our mental health and created an imperative to seize this opportunity Restorative Cities explores a new way of designing cities one which places mental health and wellness at the forefront Establishing a blueprint for urban design for mental health it examines a range of strategies from sensory architecture to place making for creativity and community and brings a genuinely evidence based approach that will appeal to designers and planners health practitioners and researchers alike and provide compelling insights for anyone who cares about how our surroundings affect us Written by a psychiatrist and public health specialist and an environmental psychologist with extensive experience of architectural practice this much needed work will prompt debate and inspire built environment students and professionals to think more about the positive potential of their designs for mental well being

Indian Labour Market and Economic Reforms

Dr. Jagdish Chauhan,2022-08-25 The global capitalism has entered into a new and distinct phase wherein liberalisation privatisation and globalisation commonly called LPG is a central theme Almost every country particularly the developing countries are on the agenda of international monopolies and international financial capital which are controlled and regulated by the industrially developed nations The vulnerable economies all over the world are being forced to liberalise their economies resulting in unfavourable balance of competitive forces on their side Free trade rules are dismantling the License Raj meant for business and industry under the dictate of global corporations Market forces have been given once again a primacy to make the major economic decisions The free trade systems of small producers and poor consumers are being dismantled and being made illegal in order to create free trade systems for big business and global corporations 1 All these have been the outcome of certain policy initiatives and developments that have taken place at the national and international level especially since the 1980s
