

10ACC SERIES UNITS

The 10ACC is a residential split-system condensing unit available in sizes ranging from 1-1/2 to 5 tons. Condensing coil size, circuiting and air volume result in a minimum SEER rating of 10.0. The series is designed for use with an expansion valve or RFC/V system in the indoor unit.

10ACC 1-1/2 to 3 ton units are equipped with reciprocating compressors. All compressors are hermetically sealed for long service life. The compressor is installed in the unit on resilient rubber mounts to assure quiet, vibration-free operation. A built-in protection device assures protection from excessive current and temperatures.

10ACC 3-1/2 to 5 ton units are equipped with scroll compressors. The scroll operates like a standard compressor but it is unique in the way it compresses refrigerant.

This manual is divided into sections which discuss the major components, refrigerant system, charging procedure, maintenance and operation sequence.

All specifications in this manual are subject to change.
