1453 The Holy War For Constantinople And Clash Of Islam West Roger Crowley:

1453 Roger Crowley, 2013-02-12 A gripping exploration of the fall of Constantinople and its connection to the world we live in today The fall of Constantinople in 1453 signaled a shift in history and the end of the Byzantium Empire Roger Crowley's readable and comprehensive account of the battle between Mehmet II sultan of the Ottoman Empire and Constantine XI the 57th emperor of Byzantium illuminates the period in history that was a precursor to the current conflict between the West and the Middle East For a thousand years Constantinople was quite simply the city fabulously wealthy imperial intimidating and Christian Singlehandedly it blunted early Arab enthusiasm for Holy War when a second wave of Islamic warriors swept out of the Asian steppes in the Middle Ages Constantinople was the ultimate prize The Red Apple It was a city that had always lived under threat On average it had survived a siege every forty years for a millennium until the Ottoman Sultan Mehmet II twenty one years old and hungry for glory rode up to the walls in April 1453 with a huge army numberless as the stars 1453 is the taut vivid story of this final struggle for the city told largely through the accounts of eyewitnesses For fifty five days a tiny group of defenders defied the huge Ottoman army in a seesawing contest fought on land at sea and underground During the course of events the largest cannon ever built was directed against the world's most formidable defensive system Ottoman ships were hauled overland into the Golden Horn and the morale of defenders was crucially undermined by unnerving portents At the center is the contest between two inspirational leaders Mehmed II and Constantine XI fighting for empire and religious faith and an astonishing finale in a few short hours on May 29 1453 a defining moment for medieval history 1453 is both a gripping work of narrative history and an account of the war between Christendom and Islam that still has echoes in the modern world *Global Race War* Alexander D. Barder, 2021-07-19 *Global Race War* explores the racial foundations of global politics from the Haitian Revolution to the present Alexander D Barder traces the emergence of this global racial hierarchy from the early 19th century to the present to explain how a historical racial global order unraveled over the first half of the 20th century continued during the Cold War and reemerged during the Global War on Terror As Barder shows imperial racial and geopolitical orders intersected over time in ways that violently tore apart the imperial and sovereign state system and continue to haunt politics today **Term Paper Resource Guide to Medieval History** Jean Shepherd Hamm, 2009-11-25 Help students get the most out of studying medieval history with this comprehensive and practical research guide to topics and resources **Term Paper Resource Guide to Medieval History** brings key historic events and individuals alive to enrich and stimulate students in challenging and enjoyable ways Students from high school to college will be able to get a jump start on assignments with the hundreds of term paper projects and research information offered here The book transforms and elevates the research experience and will prove an invaluable resource for motivating and educating students Each event entry begins with a brief summary to pique interest and then offers original and thought provoking term paper ideas in both standard and alternative formats that often

Islamic Empires Justin Marozzi, 2020-02-04 Islamic civilization was once the envy of the world From a succession of glittering cosmopolitan capitals Islamic empires lorded it over the Middle East North Africa Central Asia and swathes of the Indian subcontinent while Europe cowered feebly at the margins For centuries the caliphate was both ascendant on the battlefield and triumphant in the battle of ideas its cities unrivaled powerhouses of artistic grandeur commercial power spiritual sanctity and forward looking thinking in which nothing was off limits Islamic Empires is a history of this rich and diverse civilization told through its greatest cities over the fifteen centuries of Islam from its earliest beginnings in Mecca in the seventh century to the astonishing rise of Doha in the twenty first Marozzi brilliantly connects the defining moments in Islamic history from the Prophet Mohammed receiving his divine revelations in Mecca and the First Crusade of 1099 to the conquest of Constantinople in 1453 and the phenomenal creation of the merchant republic of Beirut in the nineteenth century and how this world is continuing to change today

Robert College of Constantinople Nick Petrov, 2023-06-21 In 1863 Protestant missionaries established Robert College in Constantinople the capital of the Ottoman Empire holding the distinction of being the pioneer American college abroad In many cases the American educators at Robert College understood the field of education as a superior tool for mission The book brings into conversation the convergence of the Protestant mission movement in the Ottoman Empire with the diverse tones of American efforts for providing education and assisting of the economic and social progress The author argues that

despite being established as a religious institution with common goals and aspirations Robert College did not fully progress and reach its ambitions until the school switched to what the founding fathers called a non religious curriculum Robert College exclusively abandoned its Christian theological curriculum by minimizing its explicitly Christian dimensions and became a school with greater financial and structural autonomy which eventually gave the school the freedom to become crossroads of cultures faiths and nationalities The story of Robert College in Constantinople is a fascinating account for examining the influence of United States foreign affairs and culture on various aspects of society in the nineteenth and early twentieth century Ottoman Empire

Sea of Faith Stephen O'Shea,2009-05-26 In Sea of Faith O Shea chronicles both the meeting of minds and the collisions of armies that marked the interaction of Cross and Crescent in the Middle Ages the better to understand their apparently intractable conflict today For all the great and everlasting moments of cultural interchange and tolerance in Cordoba Palermo Constantinople the ultimate geography of belief was decided on the battlefield O Shea vividly recounts seven pivotal battles between the forces of Christianity and Islam that shaped the Mediterranean world from the loss of the Christian Middle East to the Muslims at Yarmuk Turkey in 636 to the stemming of the seemingly unstoppable Ottoman tide at Malta in 1565 In between the battles raged round the Mediterranean from Poitiers in France and Hattin in the Holy Land during the height of the Crusades to the famed contest for Constantinople in 1453 that signaled the end of Byzantium As much as the armies were motivated by belief their exploits were inspired by leaders such as Charles Martel Saladin and Mehmet II whose stirring feats were sometimes accompanied by unexpected changes of heart

Asia from Spain **The Dove and the Dragon** Ed Simon, 2025-08-12 No Western religious concept has been as socially culturally economically and politically significant as that of the apocalypse Neither heaven and hell nor sin and salvation nor even God and the devil have merited the attention of billions of people in the manner that belief in the end of the world has Apocalyptic thinking is riven by a fruitful and at times dangerous binary between the hopes for a coming millennium when all shall be perfected or of a fiery deluge when the earth shall be destroyed The Dove and the Dragon is the first comprehensive history of Western apocalypticism Ed Simon introduces a new system for classifying movements concerned with the end of history between hopeful millennial doves and violent apocalyptic dragons This framing connects a seemingly disparate phenomenon from medieval millennialism to modern Marxism Reformation apocalypticism to contemporary techno utopianism Expected groups are considered but unexpected phenomena are interpreted through the lens of apocalypticism as well to argue that those that have often been classified as secular still take part in this ancient theological category This new way of interpreting history gives sense to the full scope of apocalypticism as a series of movements and as a genre including not just religion and theology but politics philosophy and pop culture as well The Dove and the Dragon promises to be the standard introduction for years to come **The Ottoman Turks in English Heroic Plays** Işıl Şahin

Gülter, 2019-12-02 Contesting the argument that Restoration period drama referred almost exclusively to domestic social and political issues this text interrogates the extent to which seventeenth century heroic plays justify and perpetuate stereotypical representations of the Ottoman Turks in Western discourse It provides a comprehensive account of representation of the Other based on difference Joining historical discussions ranging from the Ottoman Empire's rise as a world power to the development of British imperial ideology the book asserts that dramatic texts and production provide a rich and unexamined archive in which the issues of representation difference and cultural stereotyping are attendant on the emergence of imperial figure largely This account not only deciphers representation of the Ottoman Turks based on simplification and stereotyping in dramatic representations but also throws light on the most pressing political issues of seventeenth century England including revolution regicide and restoration dramatized in the guise of the Ottoman Turks and Ottoman history The book's attention to the Ottoman related themes of a number of plays decisively redraws the map of Restoration drama *Pivot Cities in the Rise and Fall of Civilizations* Ahmet Davutoğlu, 2021-09-30 Based on the author's

long experience in academic life and the public realm especially in foreign policy this book argues that a single categoric classification of cities is inadequate and that cities have had different and varied impacts and positions throughout the history of civilization The author examines how the formation transformation destruction or reestablishment of many civilizational cities reveals a clearer picture of the cornerstones of the course of human history These cities which play a decisive and pivotal role in the direction of the flow of history as well as providing us with a compass to guide our efforts to understand and interpret this flow are conceptualized by the author as civilizations pivot cities This innovative book explores

the role of great cities in political historical change presenting an alternative view of these pivot cities from a culturalist perspective Within this framework the role played by pivot cities in the history of civilization may be considered under seven distinct headings pioneering cities which founded civilizations cities which were founded by civilizations cities which were transplanted during the formation of civilizations ghost cities which lost their importance through shifts in political power and civilizational transformation lost cities which were destroyed by civilizations cities on lines of geocultural geoeconomic interaction and cities which combine transform or are transformed by different civilizations The author's concept of pivot cities explores the interplay between vital cities and civilizations which bears on the future of globalization at a time of instability as projected continuing de Westernization becomes a theme in studies of global history This book provides highly productive discussions relevant to the literature on city civilization relationships and the historicity of pivot cities Its clear language rich content deep and original perspective interdisciplinary approach and rich bibliography will ensure that it appeals to students and scholars in a variety of disciplines including cultural studies political science comparative urban studies anthropology history and civilizational studies

Empires Ilhan Niaz, 2014-03-26 This book is a sweeping historical survey of the origins development and nature of state power It demonstrates that Eurasia is home to a dominant tradition of arbitrary rule mediated through military civil and ecclesiastical servants and a marginal tradition of representative and responsible government through autonomous institutions The former tradition finds expression in hierarchically organized and ideologically legitimated continental bureaucratic states while the latter manifests itself in the state of laws In recent times the marginal tradition has gained in popularity and has led to continental bureaucratic states attempting to introduce democratic and constitutional reforms These attempts have rarely altered the actual manner in which power is exercised by the state and its elites given the deeper and historically rooted experience of arbitrary rule Far from being remote the arbitrary culture of power that emerged in many parts of the world continues to shape the fortunes of states To ignore this culture of power and the historical circumstances that have shaped it comes at a high price as indicated by the ongoing democratic recession and erosion of liberal norms within states that are democracies
