Seduction Wesley Felt, This book contains three titles Here are some snippets of what you can find in there Book 1 How do you encourage someone to eagerly make a purchase from you How can you ensure the sale The most effective way to gain someone s trust and motivate them to buy from you or join your team is to carefully enter the conversation already happening in their mind By doing so you help your prospect see the value of your service through the information you provide leading them to recognize their need for what you offer Book 2 Gender does influence persuasion largely due to the emotional and intellectual differences between men and women It is often believed that the direct straightforward approach typically associated with men is more effective in persuasion than the emotionally nuanced methods often attributed to women One of the key differences between men and women is that men are primarily visually stimulated This trait while sometimes criticized as shallow is rooted in our DNA and evolution Historically men were driven to seek healthy partners for reproduction as visual cues were the primary way to assess health before the advent of modern medicine In the days of early human society a woman of child bearing age who appeared healthy was naturally attractive to men as it signaled good prospects for offspring Book 3 At a certain stage in your sales process your prospect realizes they have a need ideally due to your exceptional selling skills As you guide them from recognizing this need through analysis and finally to making a decision what is on their mind Consciously or subconsciously buyers are always weighing the balance of performance image and price PIP These three factors are perceived differently by each individual and perceptions can shift over time In the current economy it s crucial to recognize that the relationship between these factors is undergoing significant changes Marketing must adapt products and messages to align with these shifts while sales teams need to adjust their presentations ask new questions and carefully consider the responses they receive
