Practical Management of Research Animal Care and Use Programs Javier Guillén, Viola Galligioni, 2024-11-06 This book provides a complete guide to all the aspects to consider during planning establishing and managing ethically and efficiently research animal care and use programs taking into account all stakeholders involved in the process Practical

information on how to address the general and particular needs of all animal care and use program areas is provided. Consequently the reader is supported with getting their project ethically and legally compliant and implemented efficiently with organizing safe and appropriate facilities and equipment as well as hiring sufficiently trained personnel. Furthermore strategies for impactful internal and external communication are outlined. Responsible use of animals in research can be nothing but teamwork. The environment and professional experience of all involved stakeholders are the key for ensuring quality science as well as animal and personnel welfare. Research animal care and use programs represent a complex system in which animals, legislation and good practices, facility personnel and researchers interact on a daily basis. Thoughtful planning from the first step ensures animal welfare and improves the quality of in vivo experimentation. This book addresses animal program managers, veterinarians, researchers and technicians working in research animal facilities. [Psychoanalytic Approach to Smoking Cessation](#) Fung Ko, 2023-12-18. A Psychoanalytic Approach to Smoking Cessation: The Cigarette as a Transitional Object provides an accessible understanding to the unconscious motive behind smoking addiction using Winnicott's concept of the transitional object. The book is divided thematically into six parts. Ko begins by outlining the conscious motives for smoking from a psychological perspective and looks at commercial research conducted by the tobacco industry before using psychoanalytically informed cross disciplinary literature to assess the unconscious motives for smoking. She expertly introduces Winnicott's view on smoking addiction using his concept of the transitional object and highlights the power of the Free Association Narrative Interview method in accessing the unconscious and embedded emotional experiences. Using clinical examples she illustrates the benefits of this method as a tool to elicit free associations from research respondents. She details the parallels between the individual respondents' smoking experience as well as their relationship with cigarettes and the seven qualities of transitional objects outlined by Winnicott in his 1953 landmark paper. Ko concludes by emphasising the significance and implications of this thesis to smokers and public health policy as well as the smoking cessation approach and proposed directions for future research. This book is an essential resource for psychoanalysts and psychotherapists working in smoking cessation organisations as well as those working in addiction services.
