China's Total War Strategy Ryan Clarke, LJ Eads, Robert McCreight, Xiaoxu Sean Lin, 2025-07-29 Our human instinct along with the chronicle of human history advises us to take heed to seriously consider what a dilemma really is and what it truly means especially if we embrace the inherent risks and drawbacks involved. Dilemmas in geopolitics and global security matters are no less pivotal with several downstream implications that are poorly understood from the standpoint of today looking forward ten years. Our ability to pinpoint what tomorrow brings in geostrategic terms is severely limited despite ongoing leadership hubris and pervasive expert assurances that few crises embedded in the future might surprise us. To readily admit there are uncertainties that estimates are best guesses and that firm predictions cannot rule out unexpected anomalies is critical. Few professional or armchair pundits would argue with the notion that often we just do not know what we do not know. So it is with the decade after 2025 and the central challenge for nations such as the United States and China. What is likely to happen when and why? We must note that dilemmas are generally defined as a situation in which a difficult choice has to be made between two or more alternatives featuring most often equally undesirable ones with uncertain outcomes. This insightful definition equips us to conditionally set the stage for examining the presumptive geopolitical trajectory of China after 2025. Why conditionally? Most assuredly because we cannot fathom or estimate in 2024 all the unforeseen crises, wildcards and variables which could influence or trigger China's leadership to act or refrain from doing so during the decade beginning in 2025. This is also cloaked in the parallel assumption that the future geostrategic trajectory of the United States is both well known and predictable. The decade after 2025 will be of primary significance for China and its Chinese Communist Party (CCP) leadership team. Numerous theories and assessments by experts and seasoned observers will be offered to explain this landmark decade for the CCP and filter into the analysis China's fragmented and covertly conflicted population. How many of its leaders want to retain an ironclad CCP control over all aspects of life in China for decades to come and can they do so? Instead, consider how many millions of Chinese citizens yearn instead during this new decade for a unique form of democratic revolt with Chinese characteristics starting right now. So a paramount dilemma for China, its leaders and its people is what dilemmas will unfold and manifest during the decade starting in 2025. Dilemmas abound for the CCP and China itself. One such dilemma is rooted in the military dimension of the CCP and the global security paradigm which China favors for itself.

Babylon's Banksters Joseph P. Farrell, 2010 In a fascinating unique and alternative history, author of *The Philosophers Stone*, Joseph P. Farrell outlines the consistent pattern and strategy of bankers in ancient and modern times and their desire to suppress the public development of alternative physics and energy technologies. He unravels how financiers usurped the money-creating power of the state to substitute a facsimile of money as

debt Here Farrell peels back the layers of deception to reveal the possible deep physics that the banksters have used in their financial policies

The Purpose of Life, Why are we Here M.G. Hocking, Professor of Materials Chemistry, University of London, 2016-02-19 There is much evidence that we have lived before and our purpose is to progress to a more advanced state The evidence also indicates that a God must exist to cause such re births on other continents and hundreds of years later The consequences of bad deeds done in previous lives explains present suffering which seems otherwise unjust Future lives lie before us and from available evidence these will be strongly influenced by our actions in our present life Nikola Tesla's Electricity Unplugged Tom Valone Ph.D., 2016-04-13 The immense genius of

Tesla resulted from a mind that could see an invention in 3 D from every angle within his mind before it was easily built Tesla s inventions were complete down to dimensions and part sizes in his visionary process Tesla would envision his electromagnetic devices as he stared into the sky or into a corner of his laboratory His inventions on rotating magnetic fields creating AC current as we know it today have changed the world yet most people have never heard of this great inventor Is he a suppressed inventor as many historians contend Many of Tesla s concepts and inventions are still thought of as science fiction today over 60 years later Includes Tesla s fantastic vision of the future his wireless transmission of power Tesla s Magnifying Transmitter the testing and building of his towers for wireless power tons more The genius of Nikola Tesla is being realized by millions all over the world

The Future of Energy Thomas Valone, 2011-05 This book reviews how man has discovered and used energy throughout the ages with a psychological perspective by using Greek mythology Gods as archetypes Written in layman s terms this resource book also presents a vast array of emerging energy technologies that can help solve mankind s energy problem and global warming New robust and eco friendly sustainable energy technologies are the Future of Energy

Coherence Carlos Orozco, 2019-07-27 Coherence is the flow of information from the intention to the purpose and from the purpose to the significance In other words every WHAT Intention has a WHAT FOR purpose and a WHY significance that leads to Congruency Coherence is enforced with truthfulness honesty transparency integrity and it is weakened and blocked by betrayal lies misrepresentation and toxic relationships at a physical emotional personal and spiritual levels The intention purpose and significance are of electromagnetic nature the resulting coherence and congruency allows for the collapse of the electromagnetic wave function giving way to the formation of vortices via the generation of gravitational waves followed by scalar waves This is possible because of the angular momentum generated by spinning energy
