Returns & Volatility of Sectoral Indices of Nifty Dr. T. Peddanna, Generally the fund managers prefer to include Nifty listed securities in their portfolio because they are the leading stocks of the nation. Using these companies constructed 11 sectors of stock indices. On the whole the analysis of 12 year data starting from April 2002 to March 2014 established two phases of sectoral indices of Nifty: they are pre and post recession periods in the light of sub prime financial crisis that cropped up across the globe during 2008-09. As this study revealed sector wise return exposure under different economic conditions it helps investors to diversify their funds to various sectors which give average return to their portfolios and at lower risk element. However this study is helped in understanding the risk return relationship between different sectors of Nifty as well as ARCH and GARCH models to estimate the volatility in the near future in great detail. The direction of the Nifty index is mainly determined by a few sectors in the long run like Bank, Pharma and Capital Goods indices. Finally this study enabled the investors to understand the risk and returns of sectoral indices of Nifty to make effective portfolio decisions under different economic conditions to sustain the portfolio with the same objectives till its tenure.
