Sidman's Neuroanatomy Douglas J. Gould, Jennifer K. Brueckner, 2007-11-01 Sidman's Neuroanatomy A Programmed Learning Tool Second Edition is an innovative combined neuroanatomy text and review that covers the structure of the entire nervous system. Its unique programmed learning approach allows students to easily retain information and learn at their own pace by slowly building on previously learned concepts throughout each chapter. The programmed learning approach introduces new information and reviews previously learned information by presenting it in new contexts, calling attention to important details and illustrating steps in a reasoning process. This learning method adds to and reinforces the student's understanding and retention of neuroanatomical knowledge. This edition features updated illustrations, a systems-based organization, and new concepts on the cerebellum, extrapyramidal pathways, special sensory pathways, diencephalon, ventricular system, and vascular anatomy. Terminology has been updated to conform to Terminologia Anatomica. Accompanying the book is a multimedia component containing an interactive question bank with fill-in-the-blank and figure labeling exercises, pop-up images, and hot spot identification questions, as well as brand new neuroanatomical animations.

Lippincott's Pocket Neuroanatomy Douglas J. Gould, 2013-04-30 Lippincott's Pocket Neuroanatomy is a go-to reference, review, and study tool for neuroanatomy and neuroscience with a strong focus on high-yield topics and presentation. It presents the essential information needed for course and board exam review in a concise, quick-reference format with tables, full-color images, and bullet-point text. The book contains multiple features identifying the clinical significance of concepts, as well as mnemonics to aid in the retention of facts. An index of terms provides easy access to facts on all neuroanatomical structures and pathways. This pocket-sized reference intuitively shows students how they typically study for exams and provides highly distilled content in one easily portable source. It is ideal for medical, dental, allied health, and graduate school students and appropriate for courses in nursing, pre-pharmacy, pre-med, and kinesiology. **Neuroanatomy** Richard L.
