Abdel-Aty,Yasser Hosni,2001 Roundabouts as Safe and Modern Solutions in Transport Networks and Systems Elżbieta Macioszek,Rahmi Akçelik,Grzegorz Sierpiński,2018-07-31 This book offers a collection of guidelines that will be particularly useful to those making decisions concerning roundabouts as safe and modern solutions in transport networks and systems The decision making support systems described here will interest those who face the challenge of finding solutions to

problems concerning modern transport systems on a daily basis. Consequently the book is chiefly intended for local authorities involved in planning and preparing development strategies for specific transport related issues in both urban and regional contexts as well as for representatives of business and industry who are directly engaged in the implementation of traffic engineering solutions. The guidelines provided in the respective chapters help to address the given problem soundly and to simplify the selection of an appropriate strategy. The topics covered include traffic conditions and the performance of single lane two lane and turbo roundabouts, road traffic safety analysis, analysis of road traffic safety improvements, surrogate safety measures at roundabouts, analysis of pedestrian behavior at pedestrian crossings with public transport vehicles, methods for assessing vehicle motion trajectory at single lane roundabouts using visual techniques, making compact two lane roundabouts effective for vulnerable road users, concepts for wireless electric vehicle charging near roundabouts, work zones and temporary traffic control at roundabouts. Since the book also considers new approaches to theoretical models including modeling roundabout capacity, models of critical gaps and follow up headways for turbo roundabouts and estimating roundabout delay while taking into account pedestrian impact, it will also appeal to researchers and scientists studying these problems. The book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organized by the Department of Transport Systems and Traffic Engineering, Silesian University of Technology in Katowice, Poland, on September 17-19, 2018.
