What Happens Next? Gail de Vos, 2012-06-26 This fascinating book uncovers the history behind urban legends and explains how the contemporary iterations of familiar fictional tales provide a window into the modern concerns and digital advancements of our society What do ghost hunting legend tripping and legendary monsters have in common with email hoaxes chain letters and horror movies In this follow up to Libraries Unlimited s *Tales Rumors and Gossip Exploring Contemporary Folk Literature in Grades 7 12*

author Gail de Vos revisits popular urban legends and examines the impact of media online social and broadcast on their current iterations What Happens Next Contemporary Urban Legends and Popular Culture traces the evolution of contemporary legends from the tradition of oral storytelling to the sharing of stories on the Internet and TV The author examines if the popularity of contemporary legends in the media has changed the form role and integrity of familiar legends In addition to revisiting some of the legends highlighted in her first book de Vos shares new tales in circulation which she sees as a direct result of technological advancements *BNA's Banking Report* ,2000 *Information Technology Security and Risk Management* Stephen C. Wingreen,Amelia Samandari,2024-05-16 Information Technology Security and Risk Management Inductive Cases for Information Security is a compilation of cases that examine recent developments and issues that are relevant to IT security managers risk assessment and management and the broader topic of IT security in the 21st century As the title indicates the cases are written and analyzed inductively which is to say that the authors allowed the cases to speak for themselves and lead where they would rather than approach the cases with presuppositions or assumptions regarding what the case should be about In other words the authors were given broad discretion to interpret a case in the most interesting and relevant manner possible any given case may be about many things depending on the perspective adopted by the reader and many different lessons may be learned The inductive approach of these cases reflects the design philosophy of the advanced IT Security and Risk Management course we teach on the topic here at the University of Canterbury where all discussions begin with the analysis of a specific case of interest and follow the most interesting and salient aspects of the case in evidence In our course the presentation analysis and discussion of a case are followed by a brief lecture to address the conceptual theoretical and scholarly dimensions arising from the case The inductive approach to teaching and learning also comes with a huge advantage the students seem to love it and often express their appreciation for a fresh and engaging approach to learning the sometimes highly technical content of an IT security course As instructors we are also grateful for the break in the typical scripted chalk and talk of a university lecture afforded by the spontaneity of the inductive approach We were motivated to prepare this text because there seems to be no other book of cases dedicated to the topic of IT security and risk management and because of our own success and satisfaction with inductive teaching and learning We believe this book would be useful either for an inductive case based course like our own or as a body of cases to be discussed in a more traditional course with a deductive approach There are abstracts and keywords for each case which would help instructors select cases for discussions on specific topics and PowerPoint slides are available as a guide for discussion about a given case [Managerial Guide for Handling Cyber-terrorism and Information Warfare](#) Lech Janczewski,Andrew M. Colarik,2005-01-01 This book presents IT managers with what cyberterrorism and information warfare is and how to handle the problems associated with them Provided by publisher *Electronic Banking Law and Commerce Report* ,2003 Information and insight into the legal regulatory legislative and policy issues in electronic banking
