Advice That Sticks Moira Somers, 2018-02-28 The advice is sound the client seems eager and then nothing happens Too often this is the experience that financial professionals encounter in their daily work When good recommendations go unimplemented clients' well being is compromised opportunities are lost and the professional relationship grows strained Advice that Sticks takes aim at the problem of financial non adherence Written by a neuropsychologist and financial change expert this book examines the five main factors that determine whether a client will follow through with financial advice Individual client psychology plays a role in non adherence so too do sociocultural and environmental factors general advice characteristics and specific challenges pertaining to the emotionally loaded domain of
