all is standing behind a unique model that you've designed and built yourself from a blank sheet of paper or even a blank CAD file and preparing to make that first take off. So sit yourself down in a comfy chair, read RCadvisors Model Airplane Design Made Easy and set off on aeromodelling's greatest adventure. Let Carlos Reyes, an aeromodeller of long standing and great talent, take you through the mysteries of how to arrive at the point that every lover of model aircraft should experience. Dereck Woodward, aeromodeller, designer and magazine writer for the past fifty years. Living in the Future Daniel Raymer, 2010-02. Dan Raymer, noted aircraft designer and author of the industry standard textbook *Aircraft Design: A Conceptual Approach*, has written a non-technical book that will be treasured by everyone who loves airplanes, wonders how they get designed, and wants to know how somebody becomes an aircraft designer. Half the book is Raymer's warm and personal memoir of growing up in the 50s and 60s as the son of a Navy Test Pilot, discovering his own love of aviation, and entering the rarefied club of those who stare at a blank sheet of paper and turn it into a new aircraft or spacecraft design. The other half covers Raymer's early involvement in the projects that became the B-2, F-22, T-45, F-35, and many more. The book is an easy read, quick-paced, funny, and aimed at a general audience. Raymer includes his mistakes, disappointments, and downright stupid decisions. It's not all airplanes; either read about Raymer's aborted musical career, his misadventures in exotic destinations like Belarus, Turkey, and Bulgaria, how he got on the Internet early enough to grab www.aircraftdesign.com, and how he came to write his design textbook. The book is in paperback and is due out this fall from Design Dimension Press, Los Angeles, CA.
