Design Of Formula Sae Suspension:

Design of Formula SAE Suspension Badih A. Jawad, Jason Baumann, 2002 **Formula SAE Suspension Design** Gabriel de Paula Eduardo, 2005 Design and Integration of a Formula SAE Suspension System Patrick Drum, 2004

Design and Analysis of Formula SAE Car Suspension Members Evan Drew Flickinger, 2014 The suspension system of a FSAE Formula Society of Automotive Engineers vehicle is a vital system with many functions that include providing vertical compliance so the wheels can follow the uneven road maintaining the wheels in the proper steer and camber attitudes to the road surface and reacting to the control forces produced by the tires acceleration braking and cornering The members that comprise the suspension are subjected to a variety of dynamic loading conditions it is imperative that they are designed properly to ensure the safety and performance of the vehicle The goal of this research is to develop a model for predicting the reaction forces in the suspension members based on the expected load scenarios the vehicle will undergo This model is compared to the current FSAE vehicle system and the design process is explained The limitations of this model are explored and future methodologies and improvement techniques are discussed **Design and Development of a Suspension System for a Formula SAE Racing Car** William Carroll, University College, Dublin. Department of Mechanical Engineering, 2002 Formula SAE Car Suspension Design and Analysis , 2003 *Introduction to Formula SAE® Suspension and Frame Design* Edmund F. Gaffney (III.), Anthony R. Salinas, Society of Automotive Engineers, 1997 **Design and Developmnt of Formula SAE Rear Suspension System** Azhar Alias, 2010 **Design and Development of Formula SAE Front Suspension System** Choon Yin Loke, 2010 The Design of an Innovative Automotive Suspension for Formula SAE Racing Applications Jared Michael Darius, 2019 This thesis details an analytical approach to an innovative suspension system design for implementation to the Formula SAE collegiate competition It focuses specifically on design relating to geometry mathematical modeling energy element relationships and computer analysis and simulation to visualize system behavior The bond graph approach is utilized for a quarter car model to facilitate understanding of the analytical process then applied to a comparative analysis between two transverse half car models The second half car model contains an additional transverse linkage with a third damper and is compared against the baseline of the first half car model without the additional linkage The transverse third damper is an innovative design said to improve straight line tire contact during single sided disturbance help mitigate the adverse effects of squat and dive while not inhibiting the function of the anti roll bar in cornering capability Additional work is done investigating an optimization of suspension geometry through mathematical modeling in MATLAB of a four bar linkage system This code helps visualize the complex motion of the upright and calculates the wheel camber rate and variation to compare against tire data analysis to match maximum tire performance characteristics with camber angle *Formula SAE Frame and Suspension Design* Ryan Paul Chase, University of Regina. Faculty of Engineering, 1996 *Design and Optimization of a Formula SAE Racecar Chassis and Suspension* Reid F.

Allen,2009 Designing and constructing a chassis and suspension system for a Formula SAE racecar is a highly complex task involving the interaction of hundreds of parts that all perform an essential function This thesis examines the critical factors in designing and implementing a Formula SAE chassis from the ground up with a focus on the performance and optimization of the vehicle as an entire system rather than a collection of individual parts Analysis includes examining the stiffness strength and weight of each part as well as design verification The thesis will serve as a summary of the knowledge that I have accumulated over four years of personally designing and overseeing the manufacturing of the MIT Motorsports suspension provide insight into the design of the MY2009 vehicle and act as a guide for future chassis designers Suspension Design and Whole-vehicle Dynamic Development of a Formula SAE Racing Car Geoff R.
