Modes of Uncertainty offers groundbreaking ways of thinking about danger risk and uncertainty from an analytical and anthropological perspective Our world the contributors show is increasingly populated by forms practices and events whose uncertainty cannot be reduced to risk and thus it is vital to distinguish between the two Drawing the lines between them they argue that the study of uncertainty should not focus solely on the appearance of new risks and dangers which no doubt abound but also on how uncertainty itself should be defined and what the implications might be for policy and government Organizing contributions from various anthropological subfields including economics business security humanitarianism health and environment Limor Samimian Darash and Paul Rabinow offer new tools with which to consider uncertainty its management and the differing modes of subjectivity appropriate to it Taking up policies and experiences as objects of research and analysis the essays here seek a rigorous inquiry into a sound conceptualization of uncertainty in order to better confront contemporary problems Ultimately they open the way for a participatory anthropology that asks crucial questions about our contemporary state *An Informed Cosmos* Peter S.
